Conquering Constructivism Pravin Bhatia,2018-04-30 This book is about improving intelligence and learning in students from Class V to Post graduation It uses constructivism as the idea to improve learning and intelligence Constructivism has existed on earth since the beginning of civilization The Bhagavad Gita is based on questions and answers Lord Krishna did not spoon feed Arjuna with solutions He could have stopped the war if he wanted but he inspired Arjuna to think and then choose what he considered was right Constructivism is about constructing new and better knowledge at every step of learning from what is available in textbooks We cannot solve today s problems with yesterday s ideas and we cannot survive until we learn to use our minds creatively to create intelligent solutions to solve the problems of life This should be the sole concern of education India can become a superpower within a few years if it does Twenty five percent of India s population is in the classroom This population is young and vibrant It can be upgraded endlessly if education inspires students to construct new knowledge as per their objectives Education did not use constructivism because it did not till now have a technique to use it though our national documents wanted it to be used in the classroom The technique is now available It has already benefitted six million students It improves learning results admissions and attendance It also reduces learning and teaching time I request teachers and parents to spread this divine technique It will prove to be the revolution that this nation and the world so badly needs and deserves **Journal** ,1989 *The World Today* ,2001 **The Macmillan English Series** ,1969
