Lehmann, 1991-06-27 This book is concerned with point estimation in Euclidean sample spaces The first four chapters deal with exact small sample theory and their approach and organization parallel those of the companion volume Testing Statistical Hypotheses TSH Optimal estimators are derived accord ing to criteria such as unbiasedness equivariance and minimaxity and the material is organized around these criteria The principal applications are to exponential and group families and the systematic discussion of the rich body of relatively simple statistical problems that fall under these headings constitutes a second major theme of the book A theory of much wider applicability is obtained by adopting a large sample approach The last two chapters are therefore devoted to large sam ple theory with Chapter 5 providing a fairly elementary introduction to asymptotic concepts and tools Chapter 6 establishes the asymptotic ef ficiency in sufficiently regular cases of maximum likelihood and related estimators and of Bayes estimators and presents a brief introduction to the local asymptotic optimality theory of Hajek and LeCam Even in these two chapters however attention is restricted to Euclidean sample spaces so that estimation in sequential analysis stochastic processes and function spaces in particular is not covered **Statistics for Management and Economics** Gerald Keller, Brian Warrack, 2003 STATISTICS FOR MANAGEMENT AND ECONOMICS is the worldwide best selling business statistics text It is currently being used at hundreds of colleges and universities

throughout the world This text teaches students how to apply statistics to real business problems through the authors unique three step approach to problem solving Students learn to IDENTIFY the right technique by focusing on the relationship between the problem and data type They then learn to COMPUTE the answer either by hand using Excel or using MINITAB Finally they INTERPRET the results in the context of the problem This approach enhances student comprehension as well as practical skills and offers maximum flexibility to instructors wishing to teach concepts by hand or with the computer or by using both hand and computer methods
