Polysynthetic Language Structures And Their Role In:

Polysynthetic Language Structures and Their Role in Pedagogy and Curriculum for BC Indigenous Languages Sarah Kell, British Columbia. Ministry of Education, 2015 This report defines polysynthesis as it applies to BC Indigenous languages and considers ways to build awareness of polysynthetic structures into language program content pedagogy and curriculum with attention to Indigenous ways of teaching and learning Teachers of Indigenous languages can improve their practice by becoming aware of the structures of words and sentences in their language and considering ways to convey these structures to their students

The Polysynthesis Parameter Mark C. Baker, 1996-01-04 This book investigates in detail the grammar of polysynthetic languages those with very complex verbal morphology Baker argues that polysynthesis is more than an accidental collection of morphological processes rather it is a systematic way of representing predicate argument relationships that is parallel to but distinct from the system used in languages like English Having repercussions for many areas of syntax and related aspects of morphology and semantics this argument results in a comprehensive picture of the grammar of polysynthetic languages Baker draws on examples from Mohawk and certain languages of the American Southwest Mesoamerica Australia and Siberia

The Languages and Linguistics of Indigenous North America Carmen Dagostino, Marianne Mithun, Keren Rice, 2023-09-05 This handbook provides broad coverage of the languages indigenous to North America with special focus on typologically interesting features and areal characteristics surveys of current work and topics of particular importance to communities The volume is divided into two major parts subfields of linguistics and family sketches The subfields include those that are customarily addressed in discussions of North American languages sounds and sound structure words sentences as well as many that have received somewhat less attention until recently tone prosody sociolinguistic variation directives information structure discourse meaning language over space and time conversation structure evidentiality pragmatics verbal art first and second language acquisition archives evolving notions of fieldwork Family sketches cover major language families and isolates and highlight topics of special value to communities engaged in work on language maintenance documentation and revitalization

The Oxford Handbook of Polysynthesis Michael Fortescue, Marianne Mithun, Nicholas Evans, 2017-09-14 This handbook offers an extensive crosslinguistic and cross theoretical survey of polysynthetic languages in which single multi morpheme verb forms can express what would be whole sentences in English These languages and the problems they raise for linguistic analyses have long featured prominently in language descriptions and yet the essence of polysynthesis remains under discussion right down to whether it delineates a distinct coherent type rather than an assortment of frequently co occurring traits Chapters in the first part of the handbook relate polysynthesis to other issues central to linguistics such as complexity the definition of the word the nature of the lexicon idiomaticity and to typological features such as argument structure and head marking Part two contains areal studies of those geographical regions of the world where polysynthesis is particularly common such as the

Arctic and Sub Arctic and northern Australia The third part examines diachronic topics such as language contact and language obsolescence while part four looks at acquisition issues in different polysynthetic languages Finally part five contains detailed grammatical descriptions of over twenty languages which have been characterized as polysynthetic with special attention given to the presence or absence of potentially criterial features

Critical Mobile Pedagogy John Traxler, Helen Crompton, 2020-11-26 Critical Mobile Pedagogy is an exploration of mobile technologies for designing and delivering equitable and empowering education around the globe Synthesizing a diverse range of projects and conceptual frameworks this case based collection addresses the ambitions assumptions and impacts of interventions in under researched often disadvantaged communities The editors and authors provide a nuanced and culturally responsive approach to showcasing indigenous nomadic refugee rural and other marginalized communities emerging pedagogies such as curation open resources massive open online courses MOOCs and self directed learning contextual factors including pedagogy ethics scaling research methodology and culture and consequences of innocuous or harmful implementation and deployment the nature of participation by global capital multinationals education systems international agencies national governments and telecoms companies Scholars academics policymakers and program managers are increasingly using mobile technologies to support disadvantaged or disempowered communities in learning more effectively and appropriately This book's diverse research precedents will help these and other stakeholders meet the challenges and opportunities of our complex increasingly connected world and work with greater cultural and ethical sensitivity at the intersection of education research and technology

Argument Structure and Syntactic Relations Maia Duguine, Susana Huidobro, Nerea Madariaga, 2010-07-14 The topic of this collection is argument structure The fourteen chapters in this book are divided into four parts Semantic and Syntactic Properties of Event Structure A Cartographic View on Argument Structure Syntactic Heads Involved in Argument Structure and Argument Structure in Language Acquisition Rigorous theoretical analyses are combined with empirical work on specific aspects of argument structure The book brings together authors working in different linguistic fields semantics syntax and language acquisition who explore new findings as well as more established data but then from new theoretical perspectives The contributions propose cartographic views of argument structure as opposed to minimalistic proposals of a binary template model for argument structure in order to optimally account for various syntactic and semantic facts as well as data derived from wider cross linguistic perspectives
