provide actionable insights to your customers and employees using automated chatbot solutions

Key Features

- Provide instant customer support on your webpages using Power Virtual Agents
- Discover tips and techniques for the governance administration and deployment of chatbots
- Build conversational solutions for your web apps public portals and Teams environment

Book Description

Power Virtual Agents is a set of technologies released under the Power Platform umbrella by Microsoft. It allows non-developers to create solutions to automate customer interactions and provide services using a conversational interface, thus relieving the pressure on front-line staff providing this kind of support.

Empowering Organizations with Power Virtual Agents

is a guide to building chatbots that can be deployed to handle front-desk services without having to write code. The book takes a scenario-based approach to implementing bot services and automation to serve employees in the organization and external customers. You will uncover the features available in Power Virtual Agents for creating bots that can be integrated into an organization's public site as well as specific web pages. Next, you will understand how to build bots and integrate them within the Teams environment for internal users. As you progress, you will explore complete examples for implementing automated agents/bots that can be deployed on sites for interacting with external customers. By the end of this Power Virtual Agents chatbot book, you will have implemented several scenarios to serve external client requests for information, created scenarios to help internal users retrieve relevant information, and processed these in an automated conversational manner.

What you will learn

- Get to grips with Power Virtual Agents and understand the license requirement for using it
- Deploy bots on public websites or web pages
- Create conversational solutions for your organization using Microsoft Teams
- Explore best practices for governance that are essential for implementing Power Virtual Agents
- Explore different business scenarios for implementing Power Virtual Agents
- Understand the integration between Power Virtual Agents and Microsoft Power Platform

Who this book is for

This book is for organization representatives looking to automate processes, relieve the first contact workload of their front-line agents, and provide actionable results to employees and customers. Business professionals, citizen developers, and functional consultants will also find this book helpful. Familiarity with the Modern Workplace and the Dynamics 365 family of products will be useful. Beginner-level knowledge of Power Platform and its main modules will assist with understanding the concepts covered in the book more effectively.

Build Better Chatbots

Rashid Khan, Anik Das, 2017-12-13

Learn best practices for building bots by focusing on the technological implementation and UX in this practical book. You will cover key topics such as setting up a development environment for creating chatbots for multiple channels (Facebook Messenger, Skype, and KiK), building a chatbot design to implementation, integrating to IFTTT (If This Then That), and IoT (Internet of Things) carrying out analytics and metrics for chatbots, and most importantly, monetizing models and business sense for chatbots. *Build Better Chatbots* is easy to follow with code snippets provided in the book and complete code open-sourced and available to download. With Facebook opening up its Messenger platform for developers, followed by Microsoft opening up Skype for development, a new channel has

emerged for brands to acquire, engage and service customers on chat with chatbots. What You Will Learn: Work with the bot development life cycle; Master bot UX design; Integrate into the bot ecosystem; Maximize the business and monetization potential for bots; Who This Book Is For: Developers, programmers and hobbyists who have basic programming knowledge. The book can be used by existing chatbot developers to gain a better understanding of analytics and the business side of bots.

Microsoft Conversational AI Platform for Developers Stephan Bisser, 2021. Build a chatbot using the Microsoft Conversational AI platform. This book will teach you step by step how to save time and money by including chatbots in your enterprise strategy. You will learn how to be proficient at every phase of development from collaboration on a chatbot in an end-to-end scenario to the first mock-up phase and on through to the deployment and evaluation phases. Microsoft built a cloud service ecosystem for running artificial intelligence workloads in public cloud scenarios and a robust AI platform that offers a broad range of services targeting conversational artificial intelligence solutions such as chatbots. Building a chatbot requires not just developer coding skills but special considerations including input from business stakeholders such as domain matter experts and power users. You will learn by example how to use a great set of tools and services to bridge the gap between business and engineering. You will learn how to successfully morph business requirements into actionable IT and engineering requirements. You will learn about Bot Framework Composer which allows power users to initiate the building of a chatbot that can then be handed over to the development team to add capabilities through code. Coverage is given to the process of sharing implementation tasks and workloads between power users who are using a low code or no code approach and developers who are building out the enhanced features for the chatbot. What You Will Learn: Understand Microsoft's comprehensive AI ecosystem and its services and solutions; Recognize which solutions and services should be applied in each business scenario; Discover no code/low code approaches for building chatbots; Develop chatbots using the conversational AI stack; Align business and development for improved chatbot outcomes and reduced time to market. This book is for developers and power users who want to build chatbots. An understanding of the core principles of writing code in .NET or JavaScript for modern web applications is expected. Stephan Bisser is a technical lead at Solvion and a Microsoft MVP for artificial intelligence. In his current role, he focuses on conversational AI, Microsoft 365 and Azure.
