A. Faris, 2019-11-04 Originally published in 1962 This book gives an account of the concepts and methods of a basic part of logic In chapter I elementary ideas including those of truth functional argument and truth functional validity are explained Chapter II begins with a more comprehensive account of truth functionality the leading characteristics of the most important monadic and dyadic truth functions are described and the different notations in use are set forth The main part of the book describes and explains three different methods of testing truth functional arguments and argument forms for validity the truth table method the deductive method and the method of normal forms for the benefit mainly of readers who have not acquired in one way or another a general facility in the manipulation of symbols some of the procedures have been described in rather more detail than is common in texts of this kind In the final chapter the author discusses and rejects the view based largely on the so called paradoxes of material implication that truth functional logic is not applicable in any really important way to arguments of ordinary discourse *Truth-functional Logic* John Acheson Faris, 2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *Forall X: Calgary* Tim Button, P.
