**Urban Design and
Representation** Barbara E.A. Piga,Rossella Salerno,2017-03-06 This book explores how environmental urban design can
benefit from established and emerging representation and simulation techniques that meet the need for a multisensory
approach Bringing together contributions by researchers and practicing professionals that approach the topics discussed
from both theoretical and practical perspectives and draw on case study applications it addresses important themes
including digital modeling physical modeling mapping and simulation The chapters are linked by their relevance to simple
but crucial questions How can representational solutions enhance an urban design approach in which people s well being is

considered the primary goal How can one best represent and design the ambiance of places What kinds of technologies and tools are available to support multisensory urban design How can current and future environments be optimally represented and simulated taking into account the way in which we experience places Shedding new light on these key questions the book offers both a reference guide for those engaged in applied research and a toolkit for professionals and students
