Numerical analysis is the study of algorithms that use numerical approximation for the problems of mathematical analysis. Numerical analysis naturally finds application in all fields of engineering and the physical sciences. Numerical methods are used to approach the solution of the problem and the use of computer improves the accuracy of the solution and working speed. Optimization is the process of finding the conditions that give the maximum or minimum value of a function. For optimization purpose linear programming technique helps the management in decision making process. This technique is used in almost every functional area of business. This book includes flowcharts and programs for various numerical methods by using MATLAB language. My hope is that this book through its careful explanations of concepts, practical examples and figures bridges the gap between knowledge and proper application of that knowledge.
