Intermediate Statistics Brett W. Pelham, 2012-08-20 *Intermediate Statistics A Conceptual Course* is a student friendly text for advanced undergraduate and graduate courses It begins with an introductory chapter that reviews descriptive and inferential statistics in plain language avoiding extensive emphasis on complex formulas The remainder of the text covers 13 different statistical topics ranging from descriptive statistics to advanced multiple regression analysis and path analysis Each chapter contains a description of the logic of each set of statistical tests or procedures and then introduces students to a series of data sets using SPSS with screen captures and detailed step by step instructions Students acquire an appreciation of the logic of descriptive and inferential statistics and an understanding of which techniques are best suited to which kinds of data or research questions

Knowledge Sharing in Research Collaborations Benjamin Niedergassel, 2011-04-05 Based on a large scale survey

Benjamin Niedergassel identifies several factors enhancing or inhibiting knowledge sharing in research collaborations. He uses these factors to derive practical implications for academia, industry, and research policy. *Applied Multivariate Research* Lawrence S. Meyers, Glenn Gamst, A.J. Guarino, 2016-10-28. Using a conceptual non-mathematical approach, the updated Third Edition provides full coverage of the wide range of multivariate topics that graduate students across the social and behavioral sciences encounter. Authors Lawrence S. Meyers, Glenn Gamst, and A.J. Guarino integrate innovative multicultural topics in examples throughout the book, which include both conceptual and practical coverage of statistical techniques of data screening, multiple regression, multilevel modeling, exploratory factor analysis, discriminant analysis, structural equation modeling, structural equation modeling invariance, survival analysis, multidimensional scaling, and cluster analysis.

Construction Dispute Research Sai On Cheung, 2014-07-08. There are three specific purposes of Construction Dispute Research. First, this volume aims to summarise studies on construction dispute. Second, apart from the theoretical constructs, where appropriate empirical tests are also included. This approach serves to go beyond the commonly used anecdotal approach for the subject matter. Third, it is the sincere hope of the authors that this book will help shape the research agenda of construction dispute. The studies are mostly framed from a management perspective, drawing on methods and concepts in contract law, economics, psychology, and management science. The book has twenty chapters that are arranged in four parts covering conceptualisation, avoidance, negotiation, and mediation. Part 1 is devoted to dispute conceptualisation. A building is only as strong as its foundation. Thus, it is no better start to study construction dispute by conceptualisation. The theme of Part 2 is dispute avoidance. The conventional wisdom of prevention is better than cure seems to be applied to all problems. As far as construction dispute is concerned, equitable risk allocation and trust are the two most commonly accepted avoidance strategies. Part 3 focuses on negotiation, which is the gateway to resolution, as almost all disputes are negotiated first before the service of other mechanisms. Negotiation is sometimes described as an art because settlement may not be obtained solely from legal and rational approaches. Part 3 discusses the behavioral dimensions of construction dispute negotiation. Part 4 deals with Mediation, a form of assisted negotiation. Specially, the skill of the mediators in facilitating settlement, the interrelationships among dispute sources, mediator tactics, and mediation outcomes are explored. The studies presented in Construction Dispute Research collectively demonstrate a holistic approach in dispute management. Each chapter can be read as a study on its own. Practitioners will find the book a handy reference in dispute management and resolution. Students would find the book useful in explaining in detail the causes of dispute, the processes to resolve them. The research design and empirical approaches are particularly useful to students in construction management, architectural surveying, and civil engineering programs.

[The Impact of Emotional Support in Managing Cardiovascular Diseases among Hispanic and Non-Hispanic Menopausal Women Aged 55 to 84 years](#) Claudette Andrea, 2014-05-27. Contrary to the perception of women that heart disease is a disease that will only strike men, heart disease was also the number one killer

among women as of 2000 Beattie 2000 After the age of 50 nearly half of all women s deaths were due to cardiovascular disease CVD Beattie 2000 CVD has been the leading cause of death among women in the United States accounting for half a million deaths and 2 5 million hospitalizations annually Deaton 2000 Women who belong to ethnic minority groups have exhibited CVD risk factors to a greater extent than Caucasian women Juarbe 1998 Many researchers have found greater prevalence of high blood pressure physical inactivity excess weight and diabetes in African American women than in Caucasian women Fleury 2000 Even fewer researchers have examined CVD risk factors among Hispanic Americans who constituted 11% of the population in the United States in 2002 Eyler Vest Sanderson Wibur 2002 More researchers must conduct studies regarding the risks of heart disease in Hispanic women It is important to note that there is a deep connection between a person s emotions nervous system endocrine system and immune system Cohen 2004 There was a link demonstrated in the literature between the availability of emotional support and the direct health outcomes produced Eyler et al 2002 As a result this study was intended to investigate the impact of emotional support from friends family and medical professionals in helping to deal with CVD in Hispanic and non Hispanic menopausal women The chapter begins with the background of the problem problem statement and significance of the study The chapter will include the research questions that guided the study and a short definition of the main terms The theoretical framework for the study is also a part of the content with further discussion provided in the literature review These sections establish the practical goals for the study and illustrate the need for continued CVD management research in the field of health
