**Green Buildings Pay** Brian Edwards, Emanuele Naboni, 2013-08-22 This third edition of Green Buildings Pay presents new evidence and new arguments concerning the institutional and business case that can be made for green design. The green argument has moved a long way forward since the previous edition and this fully updated book addresses the key issues faced by architect, engineer and client today. Green Buildings Pay Design Productivity and Ecology examines through a range of detailed case studies how different approaches to green design can produce more sustainable patterns of development. These cases are examined from three main perspectives: that of the architect, the client and the user. Completely revised with all new chapters, cases, sections and introductory material, the third edition presents over 20 new researched case studies drawn from the UK, Europe and the USA, written in collaboration with the architects, engineers, clients and user groups. Examples of office and educational buildings of high sustainable and high architectural quality, an exploration of the architectural innovations that have been driven by environmental thinking such as the new approaches to the design of building facades, roofs and atria, cases which demonstrate current practice in the area of energy eco retrofits of existing buildings, documentation of the benefit impact assessment schemes such as LEED and BREEAM have had upon client expectations and on design approaches over the past decade, beautiful full color illustrations throughout. In the fast evolving arena of green building, the book shows how architects are reshaping their practices to deal with ever more demanding energy standards and better informed users and corporate clients. *The Tall Buildings Reference Book* David Parker, Antony Wood, 2013-04-12 As the ever changing skylines of cities all over the world show, tall buildings are an increasingly important solution to accommodating growth more sustainably in today's urban areas. A case study section highlights the latest, the most innovative, the greenest and the most inspirational tall buildings being constructed today. A team of over fifty experts in all aspects of building tall have contributed to the making of the *Tall Buildings Reference Book*, creating an unparalleled source of information and inspiration for architects, engineers and developers.
