You and Your Profile Hans-Georg Moeller, Paul J. D'Ambrosio, 2021-05-25 More and more we present ourselves and encounter others through profiles A profile shows us not as we are seen directly but how we are perceived by a broader public As we observe how others observe us we calibrate our self presentation accordingly Profile based identity is evident everywhere from pop culture to politics marketing to morality But all too often critics simply denounce this alleged superficiality in defense of some supposedly pure ideal of authentic or sincere expression This book argues that the profile marks an epochal shift in our concept of identity and demonstrates why that matters *You and Your Profile* blends social theory philosophy and cultural critique to unfold an exploration of the way we have come to experience the world Instead of polemicizing against the profile Hans Georg Moeller and Paul J D Ambrosio outline how it works how we readily apply it in our daily lives and how it shapes our values personally economically and ethically They develop a practical vocabulary of life in the digital age Informed by the Daoist tradition they suggest strategies for handling the pressure of social media by distancing oneself from one's public face A deft and wide ranging consideration of our era's identity crisis this book provides vital clues on how to stay sane in a time of proliferating profiles

Narcocapitalism Laurent de Sutter,2017-11-27 What do the invention of anaesthetics in the middle of the nineteenth century the Nazis use of cocaine and the development of Prozac have in common The answer is that they re all products of the same logic that defines our contemporary era the age of anaesthesia Laurent de Sutter shows how large aspects of our lives are now characterised by the management of our emotions through drugs ranging from the everyday use of sleeping pills to hard narcotics Chemistry has become so much a part of us that we can t even see how much it has changed us In this era being a subject doesn t simply mean being subjected to powers that decide our lives it means that our very emotions have been outsourced to chemical stimulation Yet we don t understand why the drugs that we take are unable to free us from fatigue and depression and from the absence of desire that now characterizes our psychopolitical condition We have forgotten what it means to be excited because our only excitement has become drug induced We have to abandon the narcotic stimulation that we ve come to rely on and find a way back to the collective excitement that is narcocapitalism s greatest fear

Tactical Publishing Alessandro Ludovico,2024-01-16 How to level up to the next transformative phase of publishing with a critical methodology that transcends the dichotomy of paper and digital media production Publishing is experiencing one of the most transformative phases in its history In Tactical Publishing a sequel to Post Digital Print Alessandro Ludovico explores the forces driving this historical phase highlighting the tremendous opportunities it presents Our task he believes is to develop an alternative publishing system that transcends the dichotomy between paper and digital media He focuses first on the two activities on which publishing is premised reading and writing with an emphasis on writing machines and post truth in the latter and then deconstructs the concept proposing alternative strategies inspired by recent practices and unconventional uses of technology Ludovico shows how the radical and strategic use of print in the past can serve as the basis for our transition to the next phase of publishing He argues that the new ecology of publishing should be based on three main elements the stimulation of our senses the role of software in forming the publishing infrastructure and the importance of archives During this transition from the current post digital phase to the next phase independent publishers and artists as well as readers and machines will enable new structures and actions that realize the potential of publishing and the preservation of content thereby enriching social practices The author also considers the crucial social role played by new forms of libraries as artists and publishers shape the coming publishing world in its various manifestations Combining

analytical accounts of tactical strategies with examples from artworks and experimental practices the book concludes with a manifesto for publishing in the twenty first century and an appendix with a selection of one hundred publications representing the periodic table of future publishing
