   Energy Production and Management in the 21st Century V S. Syngellakis,E. Magaril,2022-07-19 The future of energy production operation and management in a changing world was the focus of the 5th International Conference on Energy Production and Management Papers presented at the meeting form this volume A focus is placed on the comparison of conventional energy sources particularly hydrocarbons with a number of other ways of producing energy emphasising new technological developments based on renewable resources such as solar hydro wind and geothermal Key to sustainability is the need to convert new sustainable sources of energy into useful forms electricity heat fuel while finding efficient ways of storage and distribution In many cases the challenges lie as much with the production of such renewable energy at an acceptable cost including damage to the environment as with the integration of those resources into the existing infrastructure The changes required to progress from an economy based mainly on hydrocarbons to one taking advantage of sustainable energy resources are massive and require considerable scientific research as well as the development of advanced engineering systems Such progress demands close collaboration between different disciplines in order to arrive at optimum solutions Also discussed is the energy use of industrial processes including the embedded energy contents of materials such as those in the built environment Energy production operation distribution and usage result in environmental risks that need to be better understood They are part of energy economics and relate to human environmental health as well as ecosystems behaviour An emphasis is placed on the ways in which more efficient use can be made of conventional as well as new energy sources This relates to savings in energy consumption reduction of energy losses as well as the implementation of smart devices and the design of intelligent distribution networks   *Cloud-based Intelligent Informative Engineering for Society 5.0* Kaushal Kishor,Neetesh Saxena,Dilkeshwar Pandey,2023-04-05 Cloud based Intelligent Informative Engineering for Society 5 0 is a model for the dissemination of cutting edge technological innovation and assistive devices for people with physical impairments This book showcases Cloud based high performance Information systems and Informatics based solutions for the verification of the information support requirements of the modern engineering healthcare modern business organization and academic communities Features Includes broad variety of methodologies and technical developments to improve research in informative engineering Explore the Internet of Things IoT blockchain technology deep learning data analytics and cloud Highlight Cloud based high performance Information systems and Informatics based solutions This book is beneficial for graduate students and researchers in computer sciences cloud computing and related subject areas   *Neural Networks and Statistical Learning* Ke-Lin Du,M. N. S. Swamy,2019-09-12 This book provides a broad yet detailed introduction to neural networks and machine learning in a statistical framework A single comprehensive resource for study and further research it explores the major popular neural network models and statistical learning approaches with examples and exercises and allows readers to gain a practical working understanding of

the content This updated new edition presents recently published results and includes six new chapters that correspond to the recent advances in computational learning theory sparse coding deep learning big data and cloud computing Each chapter features state of the art descriptions and significant research findings The topics covered include multilayer perceptron the Hopfield network associative memory models clustering models and algorithms t he radial basis function network recurrent neural networks nonnegative matrix factorization independent component analysis probabilistic and Bayesian networks and fuzzy sets and logic Focusing on the prominent accomplishments and their practical aspects this book provides academic and technical staff as well as graduate students and researchers with a solid foundation and comprehensive reference on the fields of neural networks pattern recognition signal processing and machine learning

Digital Twin Technologies and Smart Cities Maryam Farsi,Alireza Daneshkhah,Amin Hosseinian-Far,Hamid Jahankhani,2019-07-22 This book provides a holistic perspective on Digital Twin DT technologies and presents cutting edge research in the field It assesses the opportunities that DT can offer for smart cities and covers the requirements for ensuring secure safe and sustainable smart cities Further the book demonstrates that DT and its benefits with regard to data visualisation real time data analytics and learning leading to improved confidence in decision making reasoning monitoring and warning to support accurate diagnostics and prognostics acting using edge control and what if analysis and connection with back end business applications hold significant potential for applications in smart cities by employing a wide range of sensory and data acquisition systems in various parts of the urban infrastructure The contributing authors reveal how and why DT technologies that are used for monitoring visualising diagnosing and predicting in real time are vital to cities sustainability and efficiency The concepts outlined in the book represents a city together with all of its infrastructure elements which communicate with each other in a complex manner Moreover securing Internet of Things IoT which is one of the key enablers of DT s is discussed in details and from various perspectives The book offers an outstanding reference guide for practitioners and researchers in manufacturing operations research and communications who are considering digitising some of their assets and related services It is also a valuable asset for graduate students and academics who are looking to identify research gaps and develop their own proposals for further research **Intelligent Computing and Networking** Valentina Emilia Balas,Vijay Bhaskar Semwal,Anand Khandare,2023-08-04 This book gathers high quality peer reviewed research papers presented at the International Conference on Intelligent Computing and Networking IC ICN 2023 organized by the Computer Engineering Department Thakur College of Engineering and Technology in Mumbai Maharashtra India on February 24 25 2023 The book includes innovative and novel papers in the areas of intelligent computing artificial intelligence machine learning deep learning fuzzy logic natural language processing human machine interaction big data mining data science and mining applications of intelligent systems in healthcare finance agriculture and manufacturing high performance computing computer networking sensor and wireless networks Internet of Things IoT software defined

networks cryptography mobile computing digital forensics and blockchain technology   Wisdom Web of Things Ning Zhong,Jianhua Ma,Jiming Liu,Runhe Huang,Xiaohui Tao,2016-11-07 This book provides a thorough overview of the Wisdom Web of Things W2T a holistic framework for computing and intelligence in an emerging hyper world with a social cyber physical space Fast evolving Web intelligence research and development initiatives are now moving toward understanding the multifaceted nature of intelligence and incorporating it at the Web scale in a ubiquitous environment with data connection and service explosion The book focuses on the framework and methodology of W2T as well as its applications in different problem domains such as intelligent businesses urban computing social computing brain informatics and healthcare From the researcher and developer perspectives the book takes a systematic structured view of various W2T facets and their overall contribution to the development of W2T as a whole Written by leading international researchers this book is an essential reference for researchers educators professionals and tertiary HDR students working on the World Wide Web ubiquitous computing knowledge management and business intelligence   **Recent Trends in Blockchain for Information Systems Security and Privacy** Amit Kumar Tyagi,Ajith Abraham,2021-11-23 Blockchain technology is an emerging distributed decentralized architecture and computing paradigm which has accelerated the development and application of cloud fog and edge computing artificial intelligence cyber physical systems social networking crowdsourcing and crowdsensing 5g trust management and finance and other many useful sectors Nowadays the primary blockchain technology uses are in information systems to keep information secure and private However many threats and vulnerabilities are facing blockchain in the past decade such 51% attacks double spending attacks etc The popularity and rapid development of blockchain brings many technical and regulatory challenges for research and academic communities The main goal of this book is to encourage both researchers and practitioners of Blockchain technology to share and exchange their experiences and recent studies between academia and industry The reader will be provided with the most up to date knowledge of blockchain in mainstream areas of security and privacy in the decentralized domain which is timely and essential this is due to the fact that the distributed and p2p applications are increasing day by day and the attackers adopt new mechanisms to threaten the security and privacy of the users in those environments This book provides a detailed explanation of security and privacy with respect to blockchain for information systems and will be an essential resource for students researchers and scientists studying blockchain uses in information systems and those wanting to explore the current state of play   *Role of Data-Intensive Distributed Computing Systems in Designing Data Solutions* Sarvesh Pandey,Udai Shanker,Vijayalakshmi Saravanan,Rajinikumar Ramalingam,2023-01-25 This book discusses the application of data systems and data driven infrastructure in existing industrial systems in order to optimize workflow utilize hidden potential and make existing systems free from vulnerabilities The book discusses application of data in the health sector public transportation the financial institutions and in battling natural disasters among others Topics include real time applications in the current big data

perspective improving security in IoT devices data backup techniques for systems artificial intelligence based outlier prediction machine learning in OpenFlow Network and application of deep learning in blockchain enabled applications This book is intended for a variety of readers from professional industries organizations and students   **Intelligent Analytics for Industry 4.0 Applications** Avinash Chandra Pandey,Abhishek Verma,Vijaypal Singh Rathor,Munesh Singh,Ashutosh Kumar Singh,2023-06-06 The advancements in intelligent decision making techniques have elevated the efficiency of manufacturing industries and led to the start of the Industry 4 0 era Industry 4 0 is revolutionizing the way companies manufacture improve and distribute their products Manufacturers are integrating new technologies including the Internet of Things IoT cloud computing and analytics and artificial intelligence and machine learning into their production facilities throughout their operations In the past few years intelligent analytics has emerged as a solution that examines both historical and real time data to uncover performance insights Because the amount of data that needs analysis is growing daily advanced technologies are necessary to collect arrange and analyze incoming data This approach enables businesses to detect valuable connections and trends and make decisions that boost overall performance In Industry 4 0 intelligent analytics has a broader scope in terms of descriptive predictive and prescriptive subdomains To this end the book will aim to review and highlight the challenges faced by intelligent analytics in Industry 4 0 and present the recent developments done to address those challenges   *Who Owns Whom* ,1999   *Publishers, Distributors, & Wholesalers of the United States* ,1990   *Ward's Business Directory of U.S. Private and Public Companies* ,2003   **Scientific and Technical Aerospace Reports** ,1990   **NASA's University Program : Active Projects, Fiscal Year 1981** United States.
