Human Factors in Engineering Beata Mrugalska, Tareq Ahram, Waldemar Karwowski, 2023-05-23 This book addresses aspects of human factors in engineering and provides a detailed discussion of novel approaches systems engineering tools artificial cognitive systems and intelligent technologies and automation It presents applications in diverse areas including digital manufacturing transportation infrastructure development and cybersecurity This book Merges the engineering perspective with the human factors and social dimension of computing and artificial intelligence based technologies Covers technological development of human factors engineering and the human dimension in applications across all areas of modern society Relates to human behavior in the context of technology and systems interactions Discusses the design and the appropriation of 3D printing techniques in the management of an innovative product system Presents systems engineering tools user experience methodologies artificial cognitive systems intelligent technologies and automation The text is for students professionals and researchers in the fields of ergonomics human factors industrial engineering and manufacturing engineering

Developments in Lightweight Aluminum Alloys for Automotive Applications James M Boileau, 2006-02-03 The use of lightweight materials in automotive application has greatly increased in the past two decades A need to meet customer demands for vehicle safety performance and fuel efficiency has accelerated the development evaluation and employment of new lightweight materials and processes The 50 SAE Technical papers contained in this publication document the processes guidelines and physical and mechanical properties that can be applied to the selection and design of lightweight components for automotive applications The book starts off with an introduction section containing two 1920 papers that examine the use of aluminum in automobiles

**Visible Knowledge for Flawless Design** Allen C. Ward, Dantar P. Oosterwal, Durward K. Sobek II, 2018-04-17 Visible knowledge is a tool nearly lost in the West but it has been used to great effect by Toyota in its 50 year march from noncompetitiveness to its current status as the second largest automobile company in the world It is key for the 50% growth in market share Toyota plans for this decade despite worldwide overcapacity in the auto business This book presents the reader with a systematic approach to create capture and display knowledge in a way that allows development teams to optimize the design of their products and production processes Visible knowledge not only applies to knowledge management but provides a means of collaboration to facilitate better decision making in the development process This book has evolved out of a manuscript that Allen Ward the foremost U S expert on lean product development was writing at the time of his untimely death It is not intended to be a treatise of Lean product development methods Quite the opposite it is focused on one small piece visible knowledge It is however one technique that Dantar Oosterwal and Durward Sobek have found to be very effective at Harley Davidson and other places and a tool that can make a difference whether used by itself or as a starting point for a larger journey into Lean product development In completing this work Oosterwal and Sobek kept the aim true to Allen s original intent The preface and first three chapters are essentially Allen s original intellectual contribution

They have made editorial changes to improve readability and clarity of explanation Throughout they have attempted to preserve Allen s voice in the writing even keeping the narrative in first person as it was originally written They have also added a fourth chapter that highlights some practical ways to apply the ideas presented in earlier chapters illustrated with case examples from their experience

**Design Engineering** Harry Cather, Richard Douglas Morris, Mathew Philip, Chris Rose, 2001-08-21 A core text for first year modules in Design Engineering offering student centred learning based in real life engineering practice Design Engineering provides all the essential information an engineering student needs in preparation for real life engineering practice The authors take a uniquely student centred approach to the subject with easily accessible material introduced through case studies assignments and knowledge check questions This book is carefully designed to be used on a wide range of introductory courses at first degree and HND level The interactive style of the book brings the subjects to life with activities and case studies rather than devoting hundreds of pages to theory Key numerical and statistical techniques are introduced through Maths in Action panels located within the main text The content has been carefully matched to a variety of first year degree modules from IEng and other BSc Engineering and Technology courses Lecturers will find the breadth of material covered gears the book towards a flexible style of use which can be tailored to their syllabus This essential text is part of the IIE accredited textbook series from Newnes textbooks to form the strong practical business and academic foundations for the professional development of tomorrow s incorporated engineers Forthcoming lecturer support materials and the IIE textbook series website will provide additional material for handouts and assessment plus the latest web links to support and update case studies in the book Content matched to requirements of IIE and other BSc Engineering and Technology courses Practical text featuring worked examples case studies assignments and knowledge check questions throughout Maths in Action panels introduce key mathematical methods in their engineering contexts

Advances in Manufacturing IV Magdalena Diering, Michał Wiczorowski, Mukund Harugade, 2024-03-27 This book gathers timely contributions on metrology and measurement and control systems across different disciplines and fields of applications The chapters which were presented at the 8th International Scientific Technical Conference MANUFACTURING 2024 held on May 14 16 2024 in Poznan Poland cover cutting edge research and best practices concerning the use of AI based optical computed tomographic coordinate metrology and vision inspection systems to assess manufacturing processes and products They discuss strategies for automating and for improving the effectiveness of quality control and measuring processes All in all this book provides both researchers and practitioners with a timely guide on cutting edge measuring and control systems supporting the development of modern manufacturing in the context of digitalization sustainability and industry applications
