Educational Policy Evaluation through International Comparative Assessments Rolf Strietholt, Wilfried Bos, Jan-Eric Gustafsson, Monica Rosén, 2014 One of the most salient findings from the field of education is that there are huge national differences in student achievement as shown in international comparative studies like PISA and TIMSS The shockingly large gap between the highest performing countries mostly in East Asia and many European countries

corresponds to a difference in attainment of two years of schooling Although this finding has been replicated in several studies the reasons for and consequences of such differences are currently not well understood This book is a collection of essays and studies by leading experts in international comparative education who demonstrate how international comparative assessments can be used to evaluate educational policies The volume is organized into two parts that address first theoretical foundations and methodological developments in the field of international assessments and second innovative substantive studies that utilize international data for policy evaluation studies The intention of this book is to revisit the idea of using the world as an educational laboratory both to inform policy and to facilitate theory development
