Cognitive, Clinical, and Neural Aspects of Drug Addiction Ahmed Moustafa, 2020-01-10 Drug addictions are often difficult to treat. The most successful treatments begin with studying why individuals become addicted to drugs and how to change their thinking and behaviour. *Cognitive, Clinical, and Neural Aspects of Drug Addiction* focuses on the theories that cause drug addiction including avoidance behavior, self-medication, reward sensitization, behavioral inhibition, and impulsivity. Dr. Moustafa takes this book one step further by reviewing the psychological and neural causes of relapse, including the role of stress, anxiety, and depression. By examining both the causes of drug addiction and relapse, this book will help clinicians create individualized treatment options for patients suffering from drug addiction. It identifies key factors contributing to addiction, including stress, anxiety, and depression. It reviews inhibition and impulsivity in drug use, assesses the cognitive underpinnings of behavioral choices in addiction, and discusses the argument of self-medication vs. reward sensitization. It examines the psychological causes of why patients relapse.
