Opening Up Hungary To The World Market External:

Opening up Hungary to the World Market Jochen Lorentzen, 2016-07-27 This book describes the opening of the Hungarian economy from the early 1980s to the current transition. It analyses the management of external debt and international competitiveness and shows that the dismal economic performance of the country was only partially homemade. Assurances by the international financial community that uninterrupted debt service would guarantee access to international capital markets as well as protectionist western trade practices contributed considerably to Hungary's difficulties in credit management and export performance. **Foreign Economic Liberalization** Andras Koves, 2019-03-07 This groundbreaking volume combines theories of economic liberalization with a wide variety of case studies from market and socialist economies. Internationally regarded scholars and Eastern European policymakers have collaborated to evaluate the dramatic economic changes taking place throughout the world. The opening essays contribute to the theoretical debate by showing that foreign economic liberalization goes beyond reducing import barriers to policies on investment, financial liberalization, convertibility, and export promotion. Case studies compare successful and unsuccessful liberalization attempts world wide. The disintegration of the CMEA and the policy dilemmas facing Central and Eastern Europe are examined in great detail as the authors explore the pitfalls and opportunities inherent in the transformation from a centrally planned economy. This up to date text will be invaluable for courses on the history and transformation of socialist economies, comparative economic systems, and international trade and investment. *Economic Transition in Hungary and East Germany* J. Stephan, 1999-02-08 What factors determine the success of economic transition, development and growth? Examining the contrast between East German shock therapy and Hungary's gradualism, the book generates a set of generalisable conditions for economic development which imply some degree of state intervention and strategy. A stability oriented incomes policy and a carefully managed integration strategy can enable sustainable export surpluses, a competitive currency, and macroeconomic stability whilst providing sufficient room for economic restructuring, structural transformation, and technological catch up. The dangers of premature integration are examined. **The World's Markets**, 1922 *Opening Up Hungary to the World Market* Jochen Lorentzen, European University Institute, Department of Political and Social Sciences, 1993 **Journal of Economic Literature**, **World Economic Environment and the Hungarian Economy**, 1988 **Transitions to Capitalism and Democracy in Russia and Central Europe** M. Donald Hancock, John Logue, 2000-04-30 Hancock and Logue along with their contributors seek to explicate the achievements, problems, and prospects of simultaneous processes of economic and political transitions from communism to contrasting forms of market economies and democracy in Russia, Poland, the Czech Republic, Hungary, Slovenia, and eastern Germany. Contributors include 14 American and European scholars with intimate professional and personal familiarity with the various case studies. The contributors draw on process analysis and transition theory to explore different

national approaches to privatization This includes individual voucher schemes the use of investment funds the direct sale of former state owned enterprises employee buy outs direct foreign investments and their consequences for parallel processes of marketization and democratization A quarter of the volume is devoted to comparative analyses of contrasting modes of privatization the role of public opinion and law in the transition process and the international economic and political context of postcommunist transformation An important analysis for scholars students and other researchers involved with postcommunist economic and political change
