Operations Management William J Stevenson 8th Edition :

Operations Management William J. Stevenson, 2002. *Operations Management* 7 surveys the field of operations in both the services and manufacturing sectors. Provides enhanced coverage from the strategies of designing a product or service through the processes and systems of making and delivering the product and controlling the operations. All the standard topics are covered with concepts and supporting examples, problems, cases, and appropriate current news clips and readings. Stevenson highlights the very important role Operations plays in today's business world with concise coverage of concepts such as JIT, TQM, supply chain management with more thorough integration of services and increased use of real world examples. All basic quantitative techniques are presented many in supplements that can be highlighted or bypassed depending on the course structure and all are supported with step by step examples and solved problems many including example solutions built into Excel spreadsheets. The text is the most widely adopted of any for the introductory course mainly due to the balanced coverage and clearly explained concepts.

Analyzing Operations in Business Michael R. Summers, 1998-05-21. The field of operations management is increasingly recognized as being crucial to the success of a company. The premise of this book is that learning specific analytical techniques can provide a deeper understanding of the problems in operations management than merely reading about these problems. The book is concise while still providing a broad discussion of the issues and details to learn these valuable tools. Each problem area is introduced with an overview of the issues that must be addressed and the array of tools available to analyze them. Next detailed examples are presented. Through these examples the ramifications of the various approaches and the tradeoffs that must be considered when choosing one approach over another are explored. The book is a valuable resource for researchers, students, and business practitioners.
