5000 Years Of Textiles Five Thousand Years Of Textiles:

Discarded Sarah Gabbott, Jan Zalasiewicz, 2025-01-14 What will remain of our plastic cans and other junk long after humans have vanished What kind of fossils will we leave as relics into the far future A blizzard of new objects has suddenly appeared on Earth plastic bottles ballpoint pens concrete flyways outsize chicken bones aluminium cans teabags mobile phones T shirts They re produced for our comfort and pleasure then quickly discarded The number of our constructions has exploded to outweigh the whole living world This new made treasure chest underpins our lives But it is also giving a completely new style of fossilization to our planet as hyper diverse and hyper rapidly evolving technofossils spin out of our industrialized economy Designed to resist sun wind rain corrosion and decay and buried in soils seafloor muds and the gigantic middens of our landfill sites many will remain petrified as future geology What will these technofossils look like in future rock How long will they last and how will they change as they lie underground for decades then millennia then millions of years *Discarded* describes how they transform as they are attacked by bacteria baked by the Earth s inner heat squashed by overlying rock permeated by subterranean fluids crumpled by mountain building movements and what will be left of them These new fossils also have meaning for our lives today For we live on a world increasingly buried under our growing waste As our discarded artefacts begin to change into fossils they may be swallowed by birds entangle fish alter microbial communities and release toxins Even deeply buried in rock technofossils may break down into new formed oil and gas change the composition of groundwater and attract new mineral growths They will have a lasting impact It is a new planetary phenomenon now unfolding around us Scientists are only just beginning to grasp its scale and get to grips with how it functions This book describes for the general reader the kind of science that is emerging to show the far future human footprint on Earth It offers a different perspective upon fossils and fossilization one that expands the idea of what people think of as fossils and what they can tell us

5000 Years of Textiles Jennifer Harris, 2010 This is the classic comprehensive colour survey of textile art and production worldwide from prehistory to the present day It is both an authoritative work of reference and a visual delight The book opens with an expert guide to nine fundamental textile techniques from rug weaving and tapestry to felt and bark cloth Each is clearly explained using line drawings and close up colour details from actual textiles to show how people from many different traditions have made and decorated cloth through the centuries The breathtaking wealth of illustrations drawn from major collections all over the world many never published before includes costumes period interiors archive photographs and a huge variety of fabrics

Fabric Victoria Finlay, 2022-06-07 A magnificent work of original research that unravels history through textiles and cloth how we make it use it and what it means to us How is a handmade fabric helping save an ancient forest Why is a famous fabric pattern from India best known by the name of a Scottish town How is a Chinese dragon robe a diagram of the whole universe What is the difference between how the Greek Fates and the Viking

Norns used threads to tell our destiny In Fabric bestselling author Victoria Finlay spins us round the globe weaving stories of our relationship with cloth and asking how and why people through the ages have made it worn it invented it and made symbols out of it And sometimes why they have fought for it She beats the inner bark of trees into cloth in Papua New Guinea fails to handspin cotton in Guatemala visits tweed weavers at their homes in Harris and has lessons in patchwork making in Gee s Bend Alabama where in the 1930s deprived of almost everything they owned a community of women turned quilting into an art form She began her research just after the deaths of both her parents and entwined in the threads she found her personal story too Fabric is not just a material history of our world but Finlay s own journey through grief and recovery

Stewart Jr., 2019-06-12 The history of humanity can be written in terms of discovery and invention They are very different cognitive processes search for order and problem solving This book is a search for explanation of the Scientific and Industrial Revolutions It surveys seven civilizations in terms of both their achievements and their failures What were the characteristics they shared that promoted progress What prevented or discouraged progress in discovery and or in

invention Sumer was creative the mother of civilizations Egypt was not In Sumer authority was divided and it was a trading economy Egypt was authoritarian and closed Rome and Islam inherited the Greek legacy Rome was not interested it had a different agenda Islam progressed but civilization conflicted with religion and then regressed China led in inventions but then stagnated and always lagged in discovery Its ultimate failure has multiple explanations that include the scope of authority structure of society and economy and of language and script But so was its preference for intuition over logic or evidence as the method of seeking the truth It is Greek capacity for abstraction origin a mystery that was essential for its achievements discoveries of the structure of the universe and the cognitive approach to truth seeking Much invention was a byproduct of discovery It is Greek achievements in discovery and abstract reasoning that Europe adopted and advanced leading to the scientific and subsequent industrial revolutions Ours is a new phase in human history What were some of its consequences and what are its prospects
