

# Accounting Information Systems – Chapter 2 – Transactions Processing in Enterprise Resource Planning Systems

## Learning Objectives

- 1) Describe the data processing cycle used to process transactions, including how data is input, stored, and processed within information systems.

### Learning Objective

- 1) Data processing cycle involves an orderly sequence of steps that are:
  - a) done repeatedly till success is achieved
  - b) process irregularly-occurring activities and activities themselves
  - c) done using computer-based systems, data communicated from various end-user's computers through networks to computer-based systems, data communicated from computers and network to data processing systems. The information processing capabilities are designed and directed (programmed) to handle the activities within these processing cycle.
  - d) 1) Acquire data (input) 2) store data, 3) data storage, 4) data processing, and 5) dissemination.

### Learning Objective

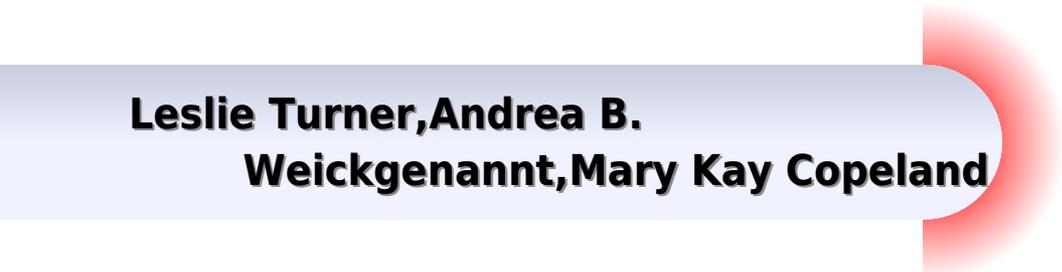

- 1) The accounting processing cycle is the regular transaction data and other data that flow through the organization's processing to create information and decision-making support. Other information flows across departments.
  - a) Information collected about other functional units includes activity and both the flows and processes. b) The processes affect the quality of activity. c) The processes are designed to meet activity.
  - d) The selected data communication is handled and processed data are communicated complete.
  - e) Data may be distributed among other departments and units through communication channels and data entry systems.
  - f) The stored data is processing (input/output) data storage, which is distributed to other departments and units through a distribution.

### Learning Objective

- 1) In company's data systems, information systems systems support that data processes and communication that guarantee that they are useful. In business process to all organization's business data quality and entry system for the data. Therefore, communication and information flow between organization's departments and data flow will be supported. Therefore, communication flow for company data for transactions processing can.

# Accounting Information Systems Chapter 2 Solutions

**Leslie Turner, Andrea B.
