Modern Biotechnology J. Tramper,Yang Zhu,2011-04-27 According to Greek mythology Pandora was sent down to earth upon the orders of Zeus She was given a mysterious box which she was not allowed to open However Pandora was very curious and when she arrived on earth she couldn t help taking a peek inside the box She saw that it was filled with gifts and calamities and to her astonishment they all escaped and spread throughout humanity with all the dire consequences thereof

Only hope was left at the bottom Figuratively speaking Pandora's box today represents a source of much suffering Is modern biotechnology just such a Pandora's box as the anti biotechnology lobby would have us believe Or can we selectively release the gifts and turn this new Pandora's box into a Panacea Modern biotechnology makes use of the recombinant DNA technology to genetically modify microorganisms plants and animals in order to make them more suitable for all kinds of applications such as cultivating food crops baking bread making wine antibiotics and hormones xenotransplantation and gene and stem cell therapy The book also particularly addresses the controversial aspects of these applications

Below-ground Interactions in Tropical Agroecosystems Meine van Noordwijk, Georg Cadisch, C. K. Ong, 2004 Below ground interactions are often seen as the dark side of agroecosystems especially when more than one crop is grown on the same piece of land at the same time this book aims to review the amount of light the past decade of research has shed on this topic It also aims to review how far we have come in unravelling the positive and negative aspects of these interactions and how in dialogue with farmers we can use the generic principles that are now emerging to look for site specific solutions
