**Bitstreams** Matthew G. Kirschenbaum, 2021-11-23 What are the future prospects for literary knowledge now that literary texts and the material remains of authorship publishing and reading are reduced to bitstreams strings of

digital ones and zeros What are the opportunities and obligations for book history textual criticism and bibliography when literary texts are distributed across digital platforms devices formats and networks Indeed what is textual scholarship when the text of our everyday speech is a verb as often as it is a noun These are the questions that motivate Matthew G Kirschenbaum in *Bitstreams* a distillation of twenty years of thinking about the intersection of digital media textual studies and literary archives With an intimate narrative style that belies the cold technics of computing Kirschenbaum takes the reader into the library where all access to Toni Morrison s papers is mediated by digital technology to the bitmapped fonts of Kamau Brathwaite s Macintosh to the process of recovering and restoring fourteen lost HyperPoems by the noted poet William Dickey and finally into the offices of Melcher Media a small boutique design studio reimagining the future of the codex A persistent theme is that bits the ubiquitous ones and zeros of computing are never self identical but always inflected by the material realities of particular systems platforms and protocols These materialities are not liabilities they are the very bulwark on which we stake the enterprise for preserving the future of literary heritage
