Environmental change and security report ,1997 *Human Security and the Environment* Edward Page,M. R.
Redclift,2002 In the post Cold War era the pre eminent threats to our security derive from human degradation of vital
ecosystems as well as the possibility of war and terrorist attack This substantial book examines this new security
environment paradigm and the way in which the activities of societies are shifting the balance with nature The distinguished
authors investigate this redefinition of security with particular reference to environmental threats such as climate change
and the availability of adequate supplies of food and water They illustrate how unfettered economic growth rising levels of
personal consumption and unsustainable natural resource and energy procurement are taking a heavy toll on the global
environment This in turn is forcing both developed and developing countries to re evaluate the more immediate
environmental security of their own populations For a truly global perspective the authors present a series of country case
studies looking at issues of security and environment and comparing how they influence policy and human well being They
also discuss a number of theoretical issues which underpin discussions of environmental security demonstrating that this is a
relatively new and essentially contested concept This thought provoking book highlights the way in which both security and
sustainability are being reworked as concepts and are being linked increasingly to social economic and cultural factors It will
be of great interest to academics researchers and students in environmental management sociology geography international
relations and politics **Dangerous Intersections** Jael Miriam Silliman,Ynestra King,1999 This collection of original
critical essays by well known feminist scholars and activists presents a multicultural international scope on the major global
issues of the day environment development and population control The authors pointed analyses reveal the racism behind
environmental degradation and immigration control the paternalism underlying many population control efforts and the
widespread scapegoating of women the poor and immigrants as the source of major world problems Dangerous Intersections
presents realistic solutions that rely on the ingenuity and resourcefulness of local communities of women as the agents of
global change Essays cover topics such as the use and mis use of reproductive technology the real impact of population
growth on the environment the devastating effects of militarism and consumption and movements for sovereignty and social
justice worldwide Dangerous Intersections will force readers to confront the intertwined effects of our attitudes toward

population the environment and development This call for just equitable solutions to urgent problems will enlighten activists scholars and policy makers alike

Migration and Climate Change Oli Brown, International Organization for Migration, 2008 This report focuses on the possible future scenarios for climate change natural disasters and migration and development looking to increase awareness and find answers to the challenges that lie ahead It states that even though it is defined as a growing crisis the consequences of climate change for human population are unclear and unpredictable The study points out that scientific basis for climate change is increasingly well established and confirms that current predictions as to the carrying capacity in large parts of the world will be compromised by climate change

Security and Development Neclâ Yongaçoğlu Tschirgi, Michael S. Lund, Francesco Mancini, 2010 Although policymakers and practitioners alike have enthusiastically embraced the idea that security and development are interdependent the precise nature and implications of the dynamic interplay between the two phenomena have been far from clear The authors of Security and Development Searching for Critical Connections realistically assess the promise and shortcomings of integrated security development policies as a strategy for conflict prevention Addressing cross cutting issues and also presenting detailed country case studies they move beyond rhetoric and generalization to make an important contribution to the international conflict prevention agenda
