

# Introduction

Fish that are native and can be located in a specific geographical area or ecosystem are referred to as indigenous fish species. India is home to a diverse range of indigenous ornamental fish species, with over 195 varieties reported from the North-East Region alone. Some of the important varieties include *Chanda nama*, *Puntius arulius*, *Poethia conchonius* etc. These ornamental fish species play a vital role in the Indian economy. They are used to decorate ponds and aquariums, and are also exported to other countries. Additionally, these species provide an important source of income for local communities, especially those living in rural areas.

*An Introduction to the Study of Fishes* Albert Carl Ludwig Gotthilf Günther, 1965

**Salmonine Introductions to the Laurentian Great Lakes** Stephen Scott Crawford, National Research Council Canada, 2001 This publication provides an historical review and evaluation of documented ecological effects associated with salmonine introductions to the Laurentian Great Lakes The introduction of salmonines to the Great Lakes date back to the 1870s when natural populations of native salmonines in the Great Lakes were in severe decline Using established evaluation protocols it was determined that there is evidence of significant ecological effects in six different categories 1 diseases and parasites 2 predation on native species 3 competition for limiting resources 4 genetic alteration 5 environmental alteration and 6 community alteration Taken together this body of evidence supports the conclusion that the ongoing introduction of non native salmonines poses an ecologically significant risk to the Great Lakes ecosystem and its native organisms and that the introductions should be terminated

Introduction to Wildlife and Fisheries David Willis, Charles Scalet, Lester Flake, 2009 This book integrates the science of wildlife and fisheries Updates include coverage of geographic information systems and biotelemetry preferred structures for fish aging information on diseases such as chronic wasting disease avian flu West Nile virus viral haemorrhagic septicemia and whirling disease
