Global Perspectives on Human Capital-Intensive Firms Cézanne, Cécile, Saglietto, Laurence, 2018-12-14 A firm's productivity has mainly been based on human capital resources with organizational value and performance dependent on the knowledge and skills of their managers and employees. Because human capital research captures the transformation and complexity of productive organizations in today's globalized economy, it is crucial to grasp the scope and breadth of human capital intensive firms (HCIF) and their impact in relation to value creation. *Global Perspectives on Human Capital Intensive Firms* is an essential reference source that provides an advanced analysis of modern firms at an analytical and empirical level, as well as a transdisciplinary approach to how human capital will impact the economics and management of a firm. Featuring research on topics such as firm performance, knowledge creation, and organizational management, this book is ideally designed for accountants, researchers, professionals, business managers, human resource managers, graduate-level students, academicians, consultants, and practitioners seeking coverage on the evolution of HCIF in different sectors, their internal and external organizations, and their performance.

IBM'S Global Talent Management Strategy John W. Boudreau, 2010 In early 2003, Randy MacDonald, the senior vice president of human resources for IBM Corporation, was reviewing his recent meeting with Sam Palmisano, the CEO of IBM. Sam and Randy discussed IBM's strategic view of the evolution of global markets, IBM's strategic position as a leader in global transformation, and the evolving needs of IBM's clients. Sam coined the phrase Globally Integrated Enterprise (GIE) to describe what he had in mind. He foresaw that IBM's clients would increasingly be moving toward a GIE, and that IBM needed to get ahead of that trend. This had implications for every aspect of IBM, including significant implications for IBM's supply chain, IT systems, strategy, marketing, and services development and deployment. Underlying all of these implications were significant challenges for IBM's human capital and its approach to human resource management. This three-part case examines the strategic issues and the solutions IBM examined and implemented to meet the changing nature of their business and client needs.
