Poor Economics Abhijit V. Banerjee, Esther Duflo, 2011-04-26 From the award winning founders of the Abdul Latif Jameel Poverty Action Lab at MIT A transformative reappraisal of the world of the extreme poor their lives desires and frustrations

Poor Economics Abhijit V Banerjee, Esther Duflo, 2026-01-23 Imagine you have a few million dollars You want to spend it on the poor How do you go about it Billions of government dollars and thousands of charitable organizations and NGOs are dedicated to helping the world's poor But much of their work is based on assumptions about the poor and the world that are untested generalizations at best harmful misperceptions at worst Abhijit V Banerjee and Esther Duflo have pioneered the use of randomized control trials in development economics through their award winning Poverty Action Lab They argue that by using randomized control trials and more generally by paying careful attention to the evidence it is possible to make accurate and often startling assessments on what really impacts the poor and what doesn't Why would a man in Morocco who doesn't have enough to eat buy a television Why is it so hard for children in poor areas to learn even when they attend school Why do the poorest people in Maharashtra spend 5 percent of their total budget on sugar Does having lots of children actually make you poorer Drawing on their research at the Poverty Action Lab and their fifteen years of fieldwork in India and across the world the two economists ask many such questions and show why the poor despite having the same desires and abilities as anyone else end up with entirely different lives Revelatory and impassioned **Poor Economics** is a pathbreaking book that will help you to understand the real causes of poverty and how to end it

Poor Economics Abhijit Banerjee, Esther Duflo, 2012-03-27 Why do the poor borrow to save Why do they miss out on free life saving immunizations but pay for unnecessary drugs In **Poor Economics** Abhijit V Banerjee and Esther Duflo two practical visionaries working toward ending world poverty answer these questions from the ground In a book the Wall Street Journal called marvelous rewarding the authors tell how the stress of living on less than 99 cents per day encourages the poor to make questionable decisions that feed not fight poverty The result is a radical rethinking of the economics of poverty that offers a ringside view of the lives of the world's poorest and shows that creating a world without poverty begins with understanding the daily decisions facing the poor

Wrecking Ball explores in an unprecedented manner a decalogue of wicked problems that confronts humanity Nuclear proliferation climate change pandemics permanent technological unemployment Orwellian public and private surveillance social media that distorts reality cyberwarfare the fragmentation of democracies the inability of nations to cabin private power the failure of multinational institutions to promote collaboration and the deepening of autocratic rule in countries that have never known anything but extractive institutions Collectively or even severally these wicked problems constitute crises that could end civilisation Does this list frighten you or do you blithely assume that tomorrow will be just like yesterday Wrecking Ball shows that without an inclusive system of global governance the collective action required to solve those wicked problems falls beyond the remit of the world's 20 inclusive democracies 50 flawed democracies and 130 extractive elitist autocracies Flawed democracies and autocracies that already struggle to produce goods necessary for their own citizens to flourish are simply incapable of committing to international arrangements that address the existential threats posed by the decalogue of wicked problems This then is our children's inheritance Dystopias far far worse than the polities that we ourselves have known What if anything can mitigate the harms that are our legacy Wrecking Ball offers as an answer a ground breaking analysis of South Africa's political economy It demonstrates that this country's elitist and extractive political and economic institutions not only make resolution of ongoing domestic crises unattainable likewise they make meaningful responses to wicked problems impossible Smart people think they have all the answers Without laboring under any such illusions Martin Luther King Jr eloquently opined The arc of the moral universe is long but it bends towards justice But what will happen King would acidly ask if we continue to dawdle and simply run out of time Wrecking Ball similarly operates under no such smart pretenses and undeterred and unmatched ventures into terrains traversed by truly great political economists Smith Ricardo Marx and Keynes By knitting together what we all know to be the facts with cutting edge theory in economics sociology history and political science the book paints an unflinching portrait of where we are and where we are headed Are we ready to be honest with ourselves about the likely future of this overheated overpopulated planet

Review Essay: Poor Economics (Banerjee/Duflo) Christopher King,2013-10-07 Literature Review from the year 2013 in the subject Politics Topic Development Politics grade 1 0 Indiana University Department of Political Science course Politics of International Development language English abstract After all we have spent billions of dollars on aid Has it done any good And sadly we don't know And worst of all we will never know Duflo 2010 01 37 Poverty alleviation is a huge humanitarian challenge and also the supreme discipline of some economists The effort to fight poverty had a mixed success so far and

scholars claim different reasons for that outcome of Besley 2012 In Poor Economics Abhijit Banerjee and Esther Duflo avoid the often polemic Sachs vs Easterly aid debate and promise a radical rethinking of the way to fight global poverty They make a convincing case about learning on the lives of the poor and the unique choices they have to face in their lives Banerjee Duflo understand how the poor perceive their conditions and come to the decision they make and are therefore able to craft better strategies and interventions that actually help the poor and do not produce unintended consequences By doing that they deliberately target the micro level and leave out the level of politics or institutions which is somewhat problematic to search effective approaches in answers of the smaller questions This essay is structured in the following way After an introduction to the analysis 2 and an overview of Randomized Controlled Trials RCTs the main method of Banerjee Duflo 2 1 the analysis will provide an assessment of key examples of the two scholars research 2 2 Subsequently an evaluation of limitations 2 3 and shortcomings 2 4 of the book will be conducted By evaluating the approach and findings of Poor Economics the essay will be able to compare it with other scholarly works 3 A conclusion 4 will summarize the review and end with a personal take on what has been learned through studying the book

Betrayed S. Kaplan, 2013-11-26 Betrayed takes a new approach to the subject of global poverty one that doesn't blame the West but also doesn't rely on the West for solutions Betrayed puts the poor themselves at center stage and shows how their entrepreneurial energies are shackled by political and social discrimination When these shackles are removed as is happening in places such as China and Vietnam the poor are able to seize opportunities and drive wealth creation Combining the latest research into poverty and state building with the author's personal observations drawn from years running businesses in the developing world Betrayed explains how leaders in the developing world can build more inclusive societies and more equitable governments thereby creating dynamic national economies and giving the poor the opportunity to accumulate the means and skills to control their own destinies This refreshing new approach will appeal to business people who are fed up with reading critiques of global poverty that see capitalism as the problem not the solution people in both the global North and South who want to see attention focused not on Western aid but on what developing countries and their citizens can do to help themselves scholars and practitioners in the development field who are looking for new practicable ideas and general readers who want accessible and engaging accounts of ordinary people struggling to overcome poverty
