Foundations of Modern Macroeconomics Ben J. Heijdra, 2017-08-25 The study of macroeconomics can seem a daunting project The field is complex and sometimes poorly defined and there are a variety of competing approaches It is easy for the senior bachelor and starting master student to get

lost in the forest of macroeconomics and the mathematics it uses extensively Foundations of Modern Macroeconomics is a guide book for the interested and ambitious student Non partisan in its approach it deals with all the major topics summarising the important approaches and providing the reader with a coherent angle on all aspects of macroeconomic thought Each chapter deals with a separate area of macroeconomics and each contains a summary section of key points and a further reading list Using nothing more than undergraduate mathematical skills it takes the student from basic IS LM style macro models to the state of the art literature on Dynamic Stochastic General Equilibrium explaining the mathematical tricks used where they are first introduced Fully updated and substantially revised this third edition of Foundations of Modern Macroeconomics now includes brand new chapters covering highly topical subjects such as dynamic programming competitive risk sharing equilibria and the New Keynesian DSGE approach

Rational Expectations and Inflation Thomas J. Sargent, 2013-05-05 A fully expanded edition of the Nobel Prize winning economist's classic book This collection of essays uses the lens of rational expectations theory to examine how governments anticipate and plan for inflation and provides insight into the pioneering research for which Thomas Sargent was awarded the 2011 Nobel Prize in economics Rational expectations theory is based on the simple premise that people will use all the information available to them in making economic decisions yet applying the theory to macroeconomics and econometrics is technically demanding Here Sargent engages with practical problems in economics in a less formal noneconometric way demonstrating how rational expectations can satisfactorily interpret a range of historical and contemporary events He focuses on periods of actual or threatened depreciation in the value of a nation's currency Drawing on historical attempts to counter inflation from the French Revolution and the aftermath of World War I to the economic policies of Margaret Thatcher and Ronald Reagan Sargent finds that there is no purely monetary cure for inflation rather monetary and fiscal policies must be coordinated This fully expanded edition of Rational Expectations and Inflation includes Sargent's 2011 Nobel lecture United States Then Europe Now It also features new articles on the macroeconomics of the French Revolution and government budget deficits

Recent Developments in Macroeconomics Edmund S. Phelps, 1991

On the Relationship Between Determinate and MSV Solutions in Linear RE Models Bennett T. McCallum, 2004 This paper considers the possibility that in linear rational expectations RE models all determinate uniquely non explosive solutions coincide with the minimum state variable MSV solution which is unique by construction In univariate specifications of the form $y_t = AE_t + y_{t-1} + C y_{t-1} + u_t$ that result holds if a RE solution is unique and non explosive then it is the same as the MSV solution Also this result holds for multivariate

versions if the A and C matrices commute and a certain regularity condition holds More generally however there are models of this form that possess unique non explosive solutions that differ from their MSV solutions Examples are provided and a strategy for easily constructing others is outlined *Economic Growth and Development* Olivier La Grandville,2011-12-12 Since the very beginnings of economics as a science which might be dated from Ibn Khaldun s Introduction to History 1377 the challenge of making societies escape from poverty and attain some degree of prosperity has always been and can remain a fundamental issue This book presents research on each of these issues **Macroeconomics** Mankiw,John Fernald,Chariot,Jason Furman,1997-01-01 **Macro II** Edward Tower,1995 The Elements and Dynamic Systems of Economic Growth and Trade Models Bjarne S.
