What Doesn't Kill Us Scott Carney, 2017-01-03 Our ancestors crossed deserts mountains and oceans without even a whisper of what anyone today might consider modern technology Those feats of endurance now seem impossible in an age where we take comfort for granted But what if we could regain some of our lost evolutionary strength by simulating the environmental conditions of our ancestors Investigative journalist and anthropologist Scott Carney takes up

the challenge to find out Can we hack our bodies and use the environment to stimulate our inner biology Helping him in his search for the answers is Dutch fitness guru Wim Hof whose ability to control his body temperature in extreme cold has sparked a whirlwind of scientific study Carney also enlists input from an Army scientist a world famous surfer the founders of an obstacle course race movement and ordinary people who have documented how they have cured autoimmune diseases lost weight and reversed diabetes In the process he chronicles his own transformational journey as he pushes his body and mind to the edge of endurance a quest that culminates in a record bending 28 hour climb to the snowy peak of Mt Kilimanjaro wearing nothing but a pair of running shorts and sneakers An ambitious blend of investigative reporting and participatory journalism What Doesn t Kill Us explores the true connection between the mind and the body and reveals the science that allows us to push past our perceived limitations Random Walks in Solitude Anil Vishnu Moharir,2024-07-11
