

3D

THE SHARED INFORMATION MODEL

3D BIM is the process of developing the project and generating necessary information in a Common Data Environment (CDE).

3D models can be used for visualisation purposes, coordination between disciplines and more.

4D

CONSTRUCTION SEQUENCE

In 4D BIM, each building component has time-related information. Project teams can use those data to produce a construction sequence simulation.

This process is giving everyone a clear understanding of the construction development at each phase.

5D

ESTIMATING & COSTING

With 5D BIM, building components in the model have cost information (purchasing cost, installing cost, maintenance cost and more).

The cost can be tracked and updated automatically during the whole process and while changes are happening.

6D

PROJECT LIFE-CYCLE (integrated) iBIM

6D BIM comes in where information for supporting facilities management and operation are added to the project.

Facilities managers have a clear understanding of what and when things require maintenance and how much they will cost.
