Understanding Leadership Robert M. McManus, Gamaliel Perruci, 2015-04-10. Lao Tzu, Marx, the Buddha, Ibsen, Machiavelli—these are just a few of the world's great thinkers who have weighed in on the subject of leadership over the centuries. Yet the contemporary student of leadership often overlooks many of these names in favour of more recent theorists hailing from the social sciences. Understanding Leadership: An Arts and Humanities Perspective takes a different angle, employing the works of the great philosophers, authors, and artists found in world civilization and presenting an arts and humanities perspective on the study of leadership. The authors build their conceptual framework using The Five Components of Leadership Model, which recognizes the leader, the followers, the goal, the environmental context, and the cultural values and norms that make up the leadership process. Supporting the text are a wealth of case studies which reflect on works such as Ayn Rand's novella *Anthem*, Eugène Delacroix's painting *Liberty Leading the People*, Charlie Chaplin's film *Modern Times*, Athol Fugard's play *Master Harold and the Boys*, Lao Tzu's poetic work *Tao Te Ching*, and Antonín Dvořák's *New World Symphony*. The authors also introduce studies from various world cultures to particularly illustrate the role cultural values and norms play in leadership. This illuminating framework promotes the multidimensional thinking that is necessary for understanding and problem solving in a complex world. Understanding Leadership: An Arts and Humanities Perspective will be a valuable textbook for both undergraduate and postgraduate leadership students, while leadership professionals will also appreciate the book's unique liberal arts and cultural approach.

**Born in Blood and Fire** John Charles Chasteen, Patterson Distinguished Term Professor of History, John Charles Chasteen, 2011-01-01. **After Eden** John Charles Chasteen, 2023-11-14. To solve the problems of the twenty-first century, historian John Charles Chasteen argues that we must first know our shared human story. In *After Eden*, prominent Latin American historian John Chasteen presents a concise, down-to-earth, fast-paced narrative of world history from the Big Bang to the present, animated by stories of people from all walks of life and enriched by insightful analysis and the author's extensive world travel. To tackle today's major problems of global inequality and environmental degradation, Chasteen argues that we must first understand our shared past, both the violent and cruel dimensions of humanity's inhumanity to itself and the aspirational ones: the creation of universal religions and ethical systems, the birth of the ideas of individual liberty and freedom, the resistance to the excesses of global capitalism, the civil rights and decolonization movements, and the environmental and social justice movements of today. For Chasteen, ultimate success hinges on our ability to recognize from our past experiences what is needed for us to live cooperatively, and most critically, the ways we educate our young people.

Sources for Latin America in the Modern World Nicola Foote, 2019. *Latin America in the Modern World*

is the first text to situate the history of Latin American into a wider global narrative and it does so without de-emphasizing the distinctive experiences of each of the Latin American countries. Focusing on five themes: state formation, the construction of national identity through popular culture and religion, economics and commodities, race, class, and gender, and the environment, and written by leading scholars, *Latin America in the Modern World* provides students today with an entry point into understanding this vital region. The authors emphasize the distinctive experiences of each of the Latin American countries. Instead of suggesting that all Latin American nations have an interchangeable heritage, the authors seek to clearly identify themes, topics, people, and intellectual currents that help to knit the history of modern Latin America into a coherent category of study. The book would not serve students well if it focused primarily on the history of the three largest countries: Mexico, Brazil, and Argentina, to the neglect of others like the Central American and Andean nations. As a consequence, case studies from almost all of the countries are included at some point in the narrative when their history seems to illuminate a theme or idea particularly effectively. In this fashion, students will come to appreciate the great diversity of history and culture within the Latin American region while simultaneously understanding how it fits into the streams and currents of world history and events more broadly.

**The Concept of Latin America in the United States** João Feres Júnior, João Feres, 2010. This book is a study of the semantics and usages of the concept of Latin America in the United States, both in everyday language and in social scientific discourses. Its guiding hypothesis is that Latin America has been historically defined in American English in opposition to a self-congratulatory image of the United States of America. This constitutes in itself an act of misrecognition because it overlooks the ways those perceived as Latin Americans actually live their lives as political and social beings. As a result of this practice, Latin Americans have historically been ascribed the most contemptible characteristics and been treated in ways that suit the derogatory representations made of them. The book also contains an original contribution to the debate about recognition. Leaning on Reinhart Koselleck's notion of asymmetrical counterconcepts, Feres Jr. devises an original typology of forms of misrecognition and applies it to the analysis of discourses on Latin America. This approach to the problem of recognition has many advantages in relation to the competing neo-Hegelian theory advocated by authors such as Axel Honneth and Charles Taylor; it can be used as a tool to resist misrecognition without having to rely on a positive substantive conception of recognition. Furthermore, contrary to the neo-Hegelian approach, it is able to address practices of misrecognition that have as an object people who are not part of the national linguistic-political community. The book's narrative follows a chronological order in which discourses and theories about Latin America are placed in their historical context and examined in search of rhetorical strategies that perpetuate forms of misrecognition. In the end, Feres Jr. demonstrates that long-standing North American pejorative perceptions about the peoples and countries seen as Latin American, found abundantly in everyday language, survive in social scientific discourse despite the reiterated claims of objectivity and value neutrality of the social sciences.
