

An aerial photograph of a large industrial or commercial complex. The scene features a wide asphalt road that curves through the area. To the left of the road, there is a large, dark-roofed building with a parking lot containing several vehicles. The surrounding landscape is lush and green, with numerous palm trees and other tropical vegetation. In the background, a large, light-colored industrial building is visible. The sky is overcast.

Brandix India Apparel City Biac:

Deepening Economic Cooperation between India and Sri Lanka Indra Nath Mukherji, Kavita Iyengar, 2013-09-01 This book analyzes the performance and impact of the India Sri Lanka free trade agreement over the past decade and suggests the way forward India became an important source of imports for Sri Lanka immediately after the implementation of the free trade agreement Bilateral trade between the countries increased steadily thereafter with Sri Lankan commodities finding a large market in India The composition of trade also changed with an increased number of new goods being traded The book computes indices and suggests scope for deepening economic cooperation between the two countries by pruning the negative lists for trade in goods identifying potential investment and suggesting policies for expanding cooperation in services

Regional Integration and Economic Development in South Asia Sultan Hafeez Rahman, Sridhar Khatri, Hans-Peter Brunner, 2012-04-01 South Asian leaders have made it a priority to tackle key regional issues such as poverty environment degradation trade and investment barriers and food insecurity among others

Sewing Success? Gladys Lopez-Acevedo, Raymond Robertson, 2012-03-14 The end of the MFA was followed by rising apparel exports falling prices and a reallocation of production and employment between countries There were also significant changes within countries The first main finding of this report is that export and employment patterns after the MFA ATC did not necessarily match predictions While many predicted that production would shift to low wage countries this book shows that only 13 percent of variation in export changes post MFA can be explained by the differences in wage levels Second changes in exports are usually but not always good indicators of what happens to wages and employment within countries This is especially important for policy because it shows that simply using exports as a metric of success in terms of helping the poor is not sufficient Third the Book identifies the specific ways that changes in the global apparel market affected earnings The Book shows that wage premiums change in predictable ways rising in most cases in countries that were proactive in adapting to the MFA phase out and expanded their market shares and falling in countries that failed to respond in a timely fashion to the changing environment The Book shows that promoting upgrading defined as shifting to higher value goods shifting up the value chain or modernizing production techniques seems to be necessary for sustainable competitiveness in the apparel sector but does not necessarily help the poor Policies that support upgrading need to be complemented with targeted workforce development to make sure that the most vulnerable workers are not left behind Having a vision for the evolution of the apparel sector that incorporates developing worker skills seems crucial Otherwise less skilled workers could miss out on opportunities to gain valuable work experience in manufacturing
