Breeding of Horticultural Crops N. Kumar,2006 The book has been designed with the main consideration to serve a dual purpose of being a text and reference Keeping this thing in mind the entire book has been divided into three major parts The first part deals with the principles and methods of breeding adopted in horticultural crops propagated both sexually and asexually The second part deals with the achievements in breeding of perennial horticultural crops The third part covers achievements made in breeding of annual horticultural crops

Breeding Of Horticultural Crops N. Kumar,2018-09-26 In the last 25 years research on horticultural crops particularly on crop improvement and breeding has been taken up by many SAU s and ICAR institutes with the result the genetic base of a number of horticultural crops has been broadened and many improved cultivars have been developed despite the fact the breeding is relatively cumbersome in many horticultural crops vis a vis agricultural crops The 3rd fully revised and expanded edition has been specially written with the hope that it may provide a satisfactory guidance for students of agriculture and horticulture including applied botany and also for the horticultural enthusiasts More emphasis has been given in this book to explain the principles and methods of breeding of important Horticulture Crops and also the achievements made in these crops in the development of new cultivars The book has been designed with the main consideration to serve a dual purpose of being a text and reference Keeping this thing in mind the entire book has been divided into three major parts The first part deals with the principles and methods of breeding adopted in horticultural crops propagated both sexually and asexually The second part deals with the achievements in breeding of perennial horticultural crops The third part covers achievements made in breeding of annual horticultural crops

Breeding of Field and Horticultural Crops B. S. Jamwal,Mohd Suhail,Manish Bakshi,2019 *Breeding Field Crops* John M. Poehlman,2012-09-13 While preparing the first edition of this textbook I attended an extension short course on writing agricultural publications The message I remember was select your audience and write to it There has never been any doubt about the audience for which this textbook was written the introductory course in crop breeding In addition it has become a widely used reference for the graduate plant breeding student and the practicing plant breeder In its preparation particular attention has been given to advances in plant breeding theory and their utility in plant breeding practice The blend of the theoretical with the practical has set this book apart from other plant breeding textbooks The basic structure and the objectives of the earlier editions remain unchanged These objectives are 1 to review essential features of plant reproduction Mendelian genetic principles and related genetic developments applicable in plant breeding practice 2 to describe and evaluate established and new plant breeding procedures and techniques and 3 to discuss plant breeding objectives with emphasis on the importance of proper choice of objective for achieving success in variety development Because plant breeding activities are normally organized around specific crops there are chapters describing breeding procedures and objectives for the major crop plants the crops were chosen for their economic importance or diversity in

breeding systems These chapters provide a broad overview of the kinds of problems with which the breeder must cope

Quality Breeding in Field Crops Asif M. Iqbal Qureshi, Zahoor Ahmad Dar, Shabir Hussain Wani, 2019-03-13 Development of superior crops that have consistent performance in quality and in quantity has not received the same emphasis in the field of genetics and breeding as merited Specialty trait requires special focus to propagate Yet basic germplasm and breeding methodologies optimized to improve crops are often applied in the development of improved specialty types However because of the standards required for specialty traits methods of development and improvement are usually more complex than those for common commodity crops The same standards of performance are desired but the genetics of the specialty traits often impose breeding criteria distinct from those of non specialty possessing crops Specifically quality improvement programs have unique characteristics that require careful handling and monitoring during their development for specific needs Adding value either via alternative products from the large volumes of grain produced or development of specialty types is of interest to producers and processors This work assimilates the most topical results about quality improvement with contemporary plant breeding approaches The objective of this book is to provide a summary of the germplasm methods of development and specific problems involved for quality breeding In total fourteen chapters written by leading scientists involved in crop improvement research provide comprehensive coverage of the major factors impacting specialty crop improvement
