show certain distinctive grammatical features like copula deletion losing of third person singular s or double negation Since these grammatical features occur variably that means in alternation with features of Standard English it remains difficult to say how many people speak AAVE This variability shows the complex social attitudes that surround AAVE Among other things that is why it has attracted the attention of many sociolinguists and has been the main focus of several public discussions Ten years ago a resolution passed by the Oakland School Board hit the headlines In comparison to their white contemporaries black children come off badly in school As a result the members of the School Board claimed that AAVE should be officially recognized as the predominantly primary language of African American students
