**Digitization in Controlling** Andre Große Kamphake,2020-01-02 Andre Große Kamphake deals with the digitization in controlling and focuses in this context on the analysis of automated forecasting processes within a chemical company He aims at outlining to what extent and how accurate forecasting processes can be automated in the age of digitization and big data Therefore the forecast of the working capital is put at the center since it plays a leading role for the cash collection process Based on data from 2015 to 2018 two different forecasting models are combined to optimally predict the different components contained in the working capital The author manages to prove that both a trained forecasting algorithm achieves a prediction accuracy of 92.49 % and statistical methods in machine learning lead to a significant increase in forecasts compared to naive forecasting models *Advancing Intelligent Networks Through Distributed Optimization* Rajest, S.

Suman, Moccia, Salvatore, Singh, Bhopendra, Regin, R., Jeganathan, Joseph,2024-08-29 The numerous developments in wireless communications and artificial intelligence AI have recently transformed the Internet of Things IoT networks to a level of connectivity and intelligence beyond any prior design This topology is sharply exemplified in mobile edge computing smart cities smart homes smart grids and the IoT among many other intelligent applications Intelligent networks are founded on integrating caching and multi agent systems that optimize data storage and the entire devices learning process However a central node through which all agents transmit status messages and reward information is a major drawback of this design pattern This central node condition instigates more communication overhead potential data leakage and the birth of data islands To reverse this trend using distributed optimization techniques and methodologies in cache enabled multi agent learning environments is increasingly beneficial *Advancing Intelligent Networks Through Distributed Optimization* explains the current race for sophisticated and accurate distributed optimization in cache enabled intelligent IoT networks given the need to make multi agent learning converge faster and reduce communication overhead These techniques will require innovative resource allocation strategies stretching from system training to caching communication and processing amongst millions of agents This book combines the key recent research in these races into a single binder that can serve all the interested theoretical and practical scholars The book focuses broadly on intelligent systems optimization trends It identifies the various applications of advanced distributed optimization from manufacturing to medicine agriculture and smart cities

**Multicultural Counseling Applications for Improved Mental Healthcare Services** Jegathesan, Anasuya Jegathevi, Abdullah, Siti Salina,2018-10-12 The availability of practical applications techniques and case studies by international therapists is limited despite expansions to the fields of clinical psychology and counseling As dialogues surrounding mental health grow in the East it is important to maintain therapeutic modalities that ensure the highest level of patient centered rehabilitation and care are met across global networks *Multicultural Counseling Applications for Improved Mental Healthcare Services* is an essential reference source that discusses techniques in addressing different religions and cultures in counseling and therapy

The research in this publication provides a platform and a voice for Eastern therapists to contribute to the body of knowledge and build a more robust therapeutic framework for practitioners worldwide. Featuring topics such as psychotherapy, refugee counseling, and women empowerment, this book is ideally designed for mental health professionals, counselors, therapists, clinical psychologists, sociologists, social workers, researchers, students, and social science academicians seeking coverage on significant advances in therapy, as well as the skills, challenges, and abilities that practitioners facing diverse populations must manage on a daily basis.

**Challenges of Contemporary Policing** Vicente Riccio, Di Jia, Dilip K. Das, 2024-10-02. This edited collection reflects contemporary challenges faced by police forces across the globe and the role of technology in addressing them. The use of science and technology raises questions about ethics, training, the well-being of people, and freedom. New technologies promise to foster police practices based on intelligence, accuracy, and preparedness and are considered necessary to overcome challenges such as declining budgets, lack of personnel, and legitimacy. However, technologies can also be used for authoritarian and nefarious purposes. For those reasons, this book aims to discuss related topics from various contexts to establish connections among common problems in the field of policing across the globe. This book provides an internationally relevant assessment of the use of technology in the field of policing, as well as the impact on training and police well-being. It is ideal for an academic audience at both graduate and undergraduate levels in the fields of criminal justice studies, police studies, legal sociology, and public policy, and will be of interest to police practitioners, legal professionals, social service workers, and public sector managers.

*Generic Systems Engineering* Nadine Schlüter, 2023-12-28. The 3rd edition is dedicated to the increased requirements for sustainability and picks up on the higher dynamics as a result of agile system development, which is widespread today. The application of the methods to technical systems is also extended to include socio-technical systems. The work provides a historical outline of development trends in systems engineering (SE) up to the present. Included is a systematic examination of the various models and procedural concepts of SE. Based on this, the Generic Systems Engineering (GSE) is developed, consisting of a new meta-model which can be combined with a project management integrated process concept in a problem-solving oriented manner and can be permanently updated or supplemented. Eight test examples show possible fields of application of the GSE, which range from virtual product development to field data feedback into it. Furthermore, examples for the transfer of GSE to socio-technical systems, i.e., companies and company networks, are presented.
