Teaching and Learning in a Digital World Michael E. Auer, David Guralnick, Istvan Simonics, 2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning ICL2017 held in Budapest Hungary on 27-29 September 2017. The authors are currently witnessing a significant transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today, the ICL conferences offer a forum for exchange concerning relevant trends and research results and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

Study Abroad 2006-2007 Unesco, 2006. Study Abroad 2006-2007 contains some 2,900 entries concerning post-secondary education and training in all academic and professional fields in countries throughout the world. Key features include information on study opportunities and financial assistance available to students wishing to study in a foreign country; National systems of higher education; Open and distance learning; ODL opportunities; Validation of foreign qualifications; How to search for quality institutions of higher education including warnings about bogus institutions. This is a trilingual edition: French, English, Spanish.

Examining Content and Language Integrated Learning (CLIL) Theories and Practices Khalyapina, Liudmila, 2020-05-08. The growing interest in the problems of integrated foreign language teaching and professional disciplines is manifested in the formulation of new concepts and approaches which at the moment are controversial. The lack of a common conceptual framework of integrated education in the system of higher professional education in different countries manifests itself in the attempts of researchers to either completely eliminate the achievements of their colleagues in this area or without any scientific and practical justification mechanically transfer foreign experiences in their conditions.

Examining Content and Language Integrated Learning (CLIL) Theories and Practices is a cutting-edge research publication that investigates the different approaches and models of progressive technology within linguodidactics and the methodologies for teaching foreign languages. Highlighting a range of topics such as blended learning, cognition, and professional discourse, this book is essential for language teachers, linguists, curriculum developers, instructional designers, deans, researchers, practitioners, administrators, educators, academicians, and students.
