Case 1

Mr. Antonio Cardeña is a graduate of Information Technology (IT) who is currently living in Mabalacat City. He worked at an IT company for five years. Mr. Cardeña has no prior entrepreneurial experience, but he strongly believes that he can venture into business and succeed.

Recently, he read from a 2022 international magazine that Mabalacat City is the capital of the world. The magazine mentioned that 70 percent of the internet traffic from the Mabalacat City originates from mobile devices such as tablets and smartphones. Mr. Cardeña also found out that nearly every resident in Mabalacat City owns a smartphone, and that on average, a smartphone owner spends at least three hours per day using his or her gadget.

In addition, Mr. Cardeña learned that by 2025, Mabalacat City will have more than 1,000,000 smartphones, which will use their devices not only for text and post on their social networking accounts, but also to access mobile banking, shop online, listen to music, watch videos, and read news and other texts. Additionally, Mr. Cardeña's research revealed that a smartphone user spends nearly two years to read some form of repair or maintenance needed.

Mr. Cardeña is now interested to explore business opportunities in Mabalacat City considering all the details he has learned. His initial idea is to establish a business in town in the Central Business District of Mabalacat. While Mr. Cardeña believes that he can be a successful entrepreneur, he remains wary of the risk of putting up a business, particularly for a first-time try.

Study the case, note, however, that the data in these cases are fictional only. For each case, the goal is to identify at least two most compelling external sources of opportunities and at least two potential businesses.

LESSON 1: FINDING BUSINESS OPPORTUNITY

Finding the right business opportunity can be daunting, challenging, and at times frustrating. What may seem like a perfect business idea may turn out to be a bad investment, so finding a true passion, you will likely encounter problems. However, even if your business is flawed, for instance, your customers might shift to a competitor or problems in your operations might adversely affect the business. Hence, venturing into business can be considered a leap of faith, with risks and challenges that ultimately test your skills, knowledge, and will.

SCANNING THE MARKET

The entrepreneur's process – or simply, the process of venturing into business formally begins with a scan of the market to find business opportunities from macro environmental sources and within the scope of the entrepreneur's community or locality. The first step is for the new entrepreneur to sit down, ideally, five business opportunities which he or she can possibly venture into.

External Sources of Business Opportunities

There are numerous external sources of business opportunities. These external sources are the external forces in the budding entrepreneur's environment, among them are the following:

- Sociocultural factors
- Technological advancement
- Economic growth or decline
- Politics and legislation
- Industry trends
- New discovery or new knowledge
- Futuristic or unexplored opportunities
- Consumer preferences, including preferences of digital customers
- Competition
- Societal problems or problems in the marketplace
- Physical location of the entrepreneur

Business Enterprise Simulation Module

Internal Sources of Business Opportunities

There are also various internal sources – the entrepreneur's strengths or assets – that drive him or her to pursue a potential business – or business opportunities. These internal sources are the following:

- Talent, hobbies, skills, expertise, or academic background
- Financial capacity
- Processes/operational capacity
- Leadership and people management skills
- Entrepreneurial attitudes/behaviors
- Vision and strategy

Identifying business opportunities from internal sources is easier to accomplish because at the onset, the entrepreneur already knows his/her strengths, so he/she can sort these down without devoting too much time.

Case 2

Mr. Don Aquino has a degree in literature and has been into poetry ever since he was a kid. He is a freelance writer, part who specializes in composing love poems during the college days. In his 10 years with a notebook, specialty paper, envelope, and a printer, he was pleasantly surprised when his love poems proceeded to the 10th booth and asked him to compose love poems. He charged P200 for each love poem. He typed each poem on his notebook using free desktop publishing software. He added design and graphics – sometimes pictures of the couple the notebook posed on through a flash drive or via Bluetooth – to the poem before printing it on a specialty paper. Don's happy incident every time a couple came by their booth to ask for a poem.

At least two compelling internal sources of opportunities and at least two potential businesses for Case 2, presented.
