## **Business Ethics Reader 3rd Edition:**

Consumer Behavior, 3rd Ed + Business Ethics Reader, 6th Ed Wayne D. Hoyer, 2004-10-01      *Professions in Ethical Focus - Second Edition* Fritz Allhoff, Jonathan Milgrim, Anand Vaidya, 2021-04-05 This second edition of *Professions in Ethical Focus* comprises over seventy five readings complemented by twenty case studies with corresponding discussion questions. These resources are organized into several thematic units including conflicts of interest, honesty, deception, and trust, privacy and confidentiality, and professionalism, diversity, and pluralism. An alternative table of contents is also provided identifying readings that bear on particular professions such as engineering, journalism, medicine, law, and policing. The book's introductory unit offers short selections from classic and contemporary ethical theory including non-Western traditions. All of the readings have been introduced by the editors and carefully excerpted for relevance, always with the needs of student readers in mind.

**Philosophy and Engineering** Diane P. Michelfelder, Byron Newberry, Qin Zhu, 2016-11-26 This volume is the result of an ongoing bridge building effort among engineers and humanists. It addresses a variety of philosophical, ethical, and policy issues emanating from engineering and technology. Interwoven through its chapters are two themes often held in tension with one another: Exploring Boundaries and Expanding Connections. *Expanding Connections* highlights contributions that look to philosophy for insight into some of the challenges engineers face in working with policy makers, lay designers, and other members of the public. It also speaks to reflections included in this volume on the connections between fact and value, reason and emotion, engineering practice and the social good, and of course between engineering and philosophy. *Exploring Boundaries* highlights contributions that focus on some type of demarcation. Public policy sets a boundary between what is regulated from what is not; academic disciplines delimit themselves by their subjects and methods of inquiry; and professions approach problems with unique goals and by using concepts and language in particular ways that create potential obstacles to collaboration with other fields. These and other forms of boundary setting are also addressed in this volume. Contributors explore these two themes in a variety of specific contexts including engineering, epistemology, engineers' social responsibilities, engineering and public policy making, engineering innovation, and the affective dimensions of engineering work. The book also includes analyses of social and ethical issues with emerging technologies such as 3D printing and its use in medical applications, as well as social robots. Initial versions of the invited papers included in this book were first presented at the 2014 meeting of the Forum on Philosophy, Engineering, and Technology (fPET) held at Virginia Tech in Blacksburg, Virginia, USA. The volume furthers fPET's intent of extending and developing the philosophy of engineering as an academic field and encouraging conversation promoting a sense of shared enterprise and building community among philosophers and engineers across a diversity of cultural backgrounds and approaches to inquiry.

Honest Work Joanne B. Ciulla, Clancy W. Martin, Robert C. Solomon, 2023-03 Designed for undergraduate, graduate, and executive business ethics courses. *Honest Work: A Business Ethics Reader* demonstrates that business ethics is primarily about the ethics of individuals. With a unique focus
