

1. If  ${}^n P_3 = 336$ , find the value of  $n$ ?

Ans: Given  ${}^n P_3 = 336 \Rightarrow \frac{n!}{(n-3)!} = 336 \Rightarrow \frac{n(n-1)(n-2)(n-3)!}{(n-3)!} = 336$   
 $\Rightarrow n(n-1)(n-2) = 8 \cdot (8-1)(8-2)$ . Therefore  $n=8$

2. If  ${}^{n-1} P_3 : {}^{n+1} P_3 = 5:12$ , Then find the value of  $n$ .

Ans: Here  $\frac{5}{12} = \frac{{}^{n-1} P_3}{{}^{n+1} P_3} = \frac{(n-2)(n-3)}{n(n+1)}$

$$\text{or } 5n^2 + 5n = 12n^2 - 60n + 72$$

$$\text{or } 7n^2 - 65n + 72 = 0$$

$$\text{or } (n-8)(7n-9) = 0$$

$$\text{or } n = 8, 9/7;$$

**Elements of Quasigroup Theory and Applications** Victor Shcherbacov, 2017-05-12 Understanding Interaction is a book that explores the interaction between people and technology in the broader context of the relations between the human made and the natural environments It is not just about digital technologies our computers smart phones the Internet but all our technologies such as mechanical electrical and electronic Our ancestors started creating mechanical tools and shaping their environments millions of years ago developing cultures and languages which in turn influenced our evolution Volume 1 of Understanding Interaction looks into this deep history starting from the tool creating period the longest and most influential on our physical and mental capacities to the settlement period agriculture domestication villages and cities written language the industrial period science engineering reformation and renaissance and finally the communication period mass media digital technologies global networks Volume 2 looks into humans in interaction our physiology anatomy neurology psychology how we experience and influence the world and how we think we think From this transdisciplinary understanding design approaches and frameworks are presented to potentially guide future developments and innovations The aim of the book is to be guide and inspiration for designers artists engineers psychologists media producers social scientists etc and as such be useful for both novices and more experienced practitioners

**FM 2009: Formal Methods** Ana Cavalcanti, Dennis Dams, 2009-11-04 th FM 2009 the 16 International Symposium on Formal Methods marked the 10th anniversary of the First World Congress on Formal Methods that was held in

1999 in Toulouse France We wished to celebrate this by advertising and organizing FM 2009 as the Second World Congress in the FM series aiming to once again bring together the formal methods communities from all over the world The statistics displayed in the table on the next page include the number of countries represented by the Programme Committee members as well as of the authors of submitted and accepted papers Novel this year was a special track on tools and industrial applications Submissions of papers on these topics were especially encouraged but not given any special treatment It was just as hard to get a special track paper accepted as any other paper What we did promote however was a discussion of how originality contribution and soundness should be judged for these papers The following questions were used by our Programme Committee

**Formal Development of a Network-Centric RTOS** Eric Verhulst, Raymond T. Boute, José Miguel Sampaio Faria, Bernhard H.C. Spth, Vitaliy Mezhyuev, 2011-08-23 Many systems devices and appliances used routinely in everyday life ranging from cell phones to cars contain significant amounts of software that is not directly visible to the user and is therefore called embedded For coordinating the various software components and allowing them to communicate with each other support software is needed called an operating system OS Because embedded software must function in real time RT a RTOS is needed This book describes a formally developed network centric Real Time Operating System OpenComRTOS One of the first in its kind OpenComRTOS was originally developed to verify the usefulness of formal methods in the context of embedded software engineering Using the formal methods described in this book produces results that are more reliable while delivering higher performance The result is a unique real time concurrent programming system that supports heterogeneous systems with just 5 Kbytes node It is compatible with safety related engineering standards such as IEC61508

Integrated Formal Methods Eerke Boiten, John Derrick, Graeme Smith, 2004-03-05 The fourth conference in the series of international meetings on Integrated Formal Methods IFM was held in Canterbury UK 4-7 April 2004 The conference was organized by the Computing Laboratory at the University of Kent whose main campus is just outside the ancient town of Canterbury part of the county of Kent Kent is situated in the southeast of England and the university sits on a hill overlooking the city of Canterbury and its world renowned cathedral The University of Kent was granted its Royal Charter in 1965 Today there are almost 10 000 full time and part time students with over 110 nationalities represented The IFM meetings have proven to be particularly successful The first meeting was held in York in 1999 and subsequently we held events in Germany in 2000 and then Finland in 2002 The conferences are held every 18 months or so and attract a wide range of participants from Europe the Americas Asia and Australia The conference is now firmly part of the formal methods conference calendar The conference has also evolved in terms of themes and subjects presented and this year in line with the subject as a whole we saw more work on verification as some of the challenges in this subject are being met The work reported at IFM conferences can be seen as part of the attempt to manage complexity by combining paradigms of specification and design so that the most appropriate design tools are used at different points in the life cycle
