Visual Metaphors Réka Benczes, Veronika Szélid, 2022-09-15 Whenever we think about the world including its concrete and abstract entities we typically see a series of so called mental images in front of our eyes that aid us in everyday problem solving and navigating ourselves in the world Visual metaphors similarly to their linguistic counterparts largely build on such images Nevertheless the interplay of metaphorical metonymical text and imagery is not necessarily and not usually straightforward and raises complex theoretical and methodological questions The eleven chapters in this collection address a wide range of such challenges such as what are visual metaphors in the first place how can they be identified what is their relationship to linguistic metaphors what are their most common manifestations what knowledge structures are required for their interpretation and how do they interact with metonymies The studies cut across linguistics politics philosophy poetry art and history highlighting the ubiquitous role that visual metaphor plays in everyday life and conceptualizations Originally published as special issue of *Cognitive Linguistic Studies* 7 1 2020
