Competence and Power in Managerial Decision-making Frank A. Heller, Bernhard Wilpert, 1981 The purpose of this book is to help people make better decisions A critical aspect of decision making is intuitive judgement and this book shows how intuition can be a studied and educated attribute It deals with the basis of intuitive judgement the types of errors people make in this activity

and means of overcoming such shortcomings While formal decision making methods are also discussed the emphasis is on the unstructured natural way people make judgements and exercise choice which accounts for almost all real decision making activity The book is quite different from standard texts on decision making methodology and standard decisions theory in that it is written from the point of view of a psychologist who recognizes that almost all decisions are based on anticipations people make about the future predictive judgements which lead to choices or decisions largely based on intuition
