Prioritizing Employee Mental Health and Well-Being for Organizational Success

Wongmahesak, Kittisak, Marzo, Roy Rillera, Ghosh, Uday Kumar, 2025-04-30 Prioritizing employee mental health and well being has become fundamental for organizational success in today's dynamic work environment. As businesses recognize the direct link between a supportive work culture and employee productivity, engagement, and retention, mental health initiatives are essential. Creating a work environment that promotes mental well-being involves offering resources such as access to counseling services, stress management programs, and fostering a healthy work-life balance. By investing in mental health support, businesses improve the overall well-being of their workforce and enhance creativity, collaboration, and morale. Organizations that proactively address these concerns position themselves as choice employers, demonstrating a commitment to the success of their workforce. *Prioritizing Employee Mental Health and Well Being for Organizational Success* explores the crucial link between employee well-being and organizational success, moving beyond simple correlation to examine the complex mechanisms driving this relationship. It features contributions from leading researchers and practitioners across organizational psychology, human resources, and business sustainability, offering diverse perspectives on workplace stress, well-being initiatives, leadership's role in fostering supportive environments, and the long-term financial benefits of prioritizing employee mental health. This book covers topics such as employee well-being, data privacy, and psychology and is a useful resource for business owners, computer engineers, psychologists, academicians, researchers, and scientists.

Information Management & Technology, 2003 **End-to-end Integration with IBM Sterling B2B Integration and Managed File Transfer Solutions** James Ballentine, Claudemir Braghirolli, Vasfi Gucer, Rahul Gupta, James Herry, Richard Kinard, Gianluca Meloni, Bala Sivasubramanian, Eduardo De Souza, Frank Strecker, Gang Yin, 2012 Across numerous vertical industries, enterprises are challenged to improve processing efficiency as transactions flow from their business communities to their internal systems and vice versa, simplify management, and expansion of the external communities accommodate customer and supplier preferences, govern the flow of information, enforce policy and standards, and protect sensitive information. Throughout this process, external partners must be on-boarded and off-boarded, information must flow across multiple communications infrastructures, and data must be mapped and transformed for consumption across multiple applications. Some transactions require synchronous or real-time processing, while others are of a more periodic nature. For some classes of customer or supplier, the enterprise might prefer a locally managed on-premise solution. For some types of communities, often small businesses, an as-a-Service solution might be the best option. Many large enterprises combine the on-premise and as-a-Service approach to serve different categories of business partners, customers, or suppliers. This IBM Redbooks publication focuses on solutions for end-to-end integration in complex value chains and presents several end-to-end common integration scenarios with IBM Sterling and IBM WebSphere portfolios.
