Machine Learning: Concepts, Methodologies, Tools and Applications Management Association, Information Resources,2011-07-31 This reference offers a wide ranging selection of key research in a complex field of study discussing topics ranging from using machine learning to improve the effectiveness of agents and multi agent systems to developing machine learning software for high frequency trading in financial markets Provided by publisher [Deep Learning and Neural Networks: Concepts, Methodologies, Tools, and Applications](#) Management Association, Information Resources,2019-10-11 Due to the growing use of web applications and communication devices the use of data has increased throughout various industries It is necessary to develop new techniques for managing data in order to ensure adequate usage Deep learning a subset of artificial intelligence and machine learning has been recognized in various real world applications such as computer vision image processing and pattern recognition The deep learning approach has opened new opportunities that can make such real life applications and tasks easier and more efficient Deep Learning and Neural Networks Concepts Methodologies Tools and Applications is a vital reference source that trends in data analytics and potential technologies that will facilitate insight in various domains of science industry business and consumer applications It also explores the latest concepts algorithms and techniques of deep learning and data mining and analysis Highlighting a range of topics such as natural language processing predictive analytics and deep neural networks this multi volume book is ideally designed for computer engineers software developers IT professionals academicians researchers and upper level students seeking current research on the latest trends in the field of deep learning *Machine Learning* ,2012 This reference offers a wide ranging selection of key research in a complex field of study discussing topics ranging from using machine learning to improve the effectiveness of agents and multi agent systems to developing machine learning software for high frequency trading in financial markets Provided by publisher **Machine Learning** Irma,2011-07-31 *Machine Learning* Irma,2011-07-31 *Machine Learning* Irma,2011-07-31 [Machine Learning](#) ,2012 This reference offers a wide ranging selection of key research in a complex field of study discussing topics ranging from using machine learning to improve the effectiveness of agents and multi agent systems to developing machine learning software for high frequency trading in financial markets Provided by publisher [Artificial Intelligence: Concepts, Methodologies, Tools, and Applications](#) Management Association, Information Resources,2016-12-12 Ongoing advancements in modern technology have led to significant developments in artificial intelligence With the numerous applications available it becomes imperative to conduct research and make further progress in this field Artificial Intelligence Concepts Methodologies Tools and Applications provides a comprehensive overview of the latest breakthroughs and recent progress in artificial intelligence Highlighting relevant technologies uses and techniques across various industries and settings this publication is a pivotal reference source for researchers professionals academics upper level students and practitioners interested in emerging perspectives in the field of artificial

intelligence **Computer Vision: Concepts, Methodologies, Tools, and Applications** Management Association, Information Resources,2018-02-02 The fields of computer vision and image processing are constantly evolving as new research and applications in these areas emerge Staying abreast of the most up to date developments in this field is necessary in order to promote further research and apply these developments in real world settings Computer Vision Concepts Methodologies Tools and Applications is an innovative reference source for the latest academic material on development of computers for gaining understanding about videos and digital images Highlighting a range of topics such as computational models machine learning and image processing this multi volume book is ideally designed for academicians technology professionals students and researchers interested in uncovering the latest innovations in the field *Machine Learning* T V Geetha,S Sendhilkumar,2023-05-17 Machine Learning Concepts Techniques and Applications starts at basic conceptual level of explaining machine learning and goes on to explain the basis of machine learning algorithms The mathematical foundations required are outlined along with their associations to machine learning The book then goes on to describe important machine learning algorithms along with appropriate use cases This approach enables the readers to explore the applicability of each algorithm by understanding the differences between them A comprehensive account of various aspects of ethical machine learning has been discussed An outline of deep learning models is also included The use cases self assessments exercises activities numerical problems and projects associated with each chapter aims to concretize the understanding Features Concepts of Machine learning from basics to algorithms to implementation Comparison of Different Machine Learning Algorithms When to use them Why for Application developers and Researchers Machine Learning from an Application Perspective General Machine learning for Healthcare Education Business Engineering Applications Ethics of machine learning including Bias Fairness Trust Responsibility Basics of Deep learning important deep learning models and applications Plenty of objective questions Use Cases Activity and Project based Learning Exercises The book aims to make the thinking of applications and problems in terms of machine learning possible for graduate students researchers and professionals so that they can formulate the problems prepare data decide features select appropriate machine learning algorithms and do appropriate performance evaluation *Deep Learning and Neural Networks* Information Resources Management Association,2020 **Machine Learning** Thomas Laville,2017-10-29 Thinking of learning more in Machine Learning Then you have landed in the right place The overall aim of this book is to explore and examine key concepts methods and techniques used in the Machine Learning Machines have come a part of our lives No matter where you go you will always find a machine around you but it is only over the last few years that we have understood and enhanced the capabilities of machines Machines can now perform tasks that involve the simulation of cognition which is a task that until recently only human beings could accomplish The ever growing capabilities of machines are instilling a sense of fear among observers What if machines became more intelligent than human beings become and decided to

eliminate any human being who was not so smart as them Machine learning is not as simple as turning a switch on and off It is not an out of the box solution either Machines and statistical algorithms work in parallel with each other This book will help you explore exactly what Machine learning is and will introduce the reader the concepts techniques application of Machine Learning Algorithms with the practical case studies and walk through examples to practice By the time you are done reading this book you will have a complete understanding as to what Machine Learning is Following are the important points discussed in this book First Part Introduction to Machine Learning Definition of Machine Learning and Artificial Intelligence Goals and importance of Machine Learning Using of Machine Learning Workkflow of Machine Learning Subjects involved in Machine Learning Second Part Types of Machine Learning Supervised Learning Unsupervised Learning Semi Supervised Learning Reinforcement Learning Third Part Techniques and Algorithms of Machine Learning Linear Regression Modeling Decision Trees Bagging Random Forest and Boosting Algorithms Principal Component Analysis K means K Nearest Neighbors Logistic Regression Na ve Bayes Estimation Support Vector Machines Hierarchical Clustering Association Rules and Frequent Patterns Analysis Part 4 Problems in Machine Learning Overfitting and Underfitting Problems Bias and Variance Tradeoff The sparcity Problem Dinensionality Problem Data Problem Simplicity and Accuracy Book Objectives To have an appreciation for Machine Learning and an understanding of their fundamental principles To have an elementary adeptness in a Machine Learning Concepts and terms which includes an ability to understand the algorithms Target Users This book designed for a variety of target audiences The most suitable users would include Newbies in Computer Science Techniques and Artificial Intelligence Professionals in Data scientist and Social Sciences Professors lecturers or tutors to be in position to find better ways to explain the content to their students with simples and easiest way The students and Academicians especially those that are focusing on Machine Learning as their professions Scroll to the top and click on buy now to get started

Machine Learning and Big Data Uma N. Dulhare,Khaleel Ahmad,Khairol Amali Bin Ahmad,2020-09-01 This book is intended for academic and industrial developers exploring and developing applications in the area of big data and machine learning including those that are solving technology requirements evaluation of methodology advances and algorithm demonstrations The intent of this book is to provide awareness of algorithms used for machine learning and big data in the academic and professional community The 17 chapters are divided into 5 sections Theoretical Fundamentals Big Data and Pattern Recognition Machine Learning Algorithms Machine Learning s Next Frontier and Hands On and Case Study While it dwells on the foundations of machine learning and big data as a part of analytics it also focuses on contemporary topics for research and development In this regard the book covers machine learning algorithms and their modern applications in developing automated systems Subjects covered in detail include Mathematical foundations of machine learning with various examples An empirical study of supervised learning algorithms like Na ve Bayes KNN and semi supervised learning algorithms viz S3VM Graph Based Multiview Precise study on unsupervised learning algorithms like

GMM K mean clustering Dirichlet process mixture model X means and Reinforcement learning algorithm with Q learning R learning TD learning SARSA Learning and so forth Hands on machine learning open source tools viz Apache Mahout H2O Case studies for readers to analyze the prescribed cases and present their solutions or interpretations with intrusion detection in MANETS using machine learning Showcase on novel user cases Implications of Electronic Governance as well as Pragmatic Study of BD ML technologies for agriculture healthcare social media industry banking insurance and so on

Data Mining: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2012-11-30 Data mining continues to be an emerging interdisciplinary field that offers the ability to extract information from an existing data set and translate that knowledge for end users into an understandable way Data Mining Concepts Methodologies Tools and Applications is a comprehensive collection of research on the latest advancements and developments of data mining and how it fits into the current technological world *Intelligent Information Technologies: Concepts, Methodologies, Tools, and Applications* Sugumaran, Vijayan, 2007-11-30 This set compiles more than 240 chapters from the world's leading experts to provide a foundational body of research to drive further evolution and innovation of these next generation technologies and their applications of which scientific technological and commercial communities have only begun to scratch the surface

Online and Distance Learning Lawrence A. Tomei, 2008 This comprehensive six volume collection addresses all aspects of online and distance learning including information communication technologies applied to education virtual classrooms pedagogical systems Web based learning library information systems virtual universities and more It enables libraries to provide a foundational reference to meet the information needs of researchers educators practitioners administrators and other stakeholders in online and distance learning Provided by publisher

Cognitive Analytics Information Resources Management Association, 2020 This book provides emerging perspectives on the theoretical and practical aspects of data analysis tools and techniques It also examines the incorporation of pattern management as well as decision making and prediction processes through the use of data management and analysis

Machine Learning: Concepts, Tools And Data Visualization Minsoo Kang, Eunsoo Choi, 2021-03-16 This set of lecture notes written for those who are unfamiliar with mathematics and programming introduces the reader to important concepts in the field of machine learning It consists of three parts The first is an overview of the history of artificial intelligence machine learning and data science and also includes case studies of well known AI systems The second is a step by step introduction to Azure Machine Learning with examples provided The third is an explanation of the techniques and methods used in data visualization with R which can be used to communicate the results collected by the AI systems when they are analyzed statistically Practice questions are provided throughout the book

Machine Learning: Concepts, Tools and Techniques Ivy Wright, 2022-09-13 The study of computer algorithms that improve automatically through experience and by the use of data is referred to as machine learning It is considered to be a part of artificial intelligence Data mining is a related area of study

focusing on exploratory data analysis through unsupervised learning Performing machine learning involves creating a model Some of the different types of models that are used and researched for machine learning systems are artificial neural networks decision trees support vector machines regression analysis Bayesian networks and genetic algorithms There are many applications for machine learning such as agriculture banking economics marketing medical diagnosis telecommunication software engineering time series forecasting and bioinformatics As this field is emerging at a rapid pace the contents of this book will help the readers understand the modern concepts and applications of the subject It provides comprehensive insights into the field of machine learning This book is a collective contribution of a renowned group of international experts

Data Warehousing and Mining ,2008 This collection offers tools designs and outcomes of the utilization of data mining and warehousing technologies such as algorithms concept lattices multidimensional data and online analytical processing With more than 300 chapters contributed by over 575 experts from around the globe this authoritative collection will provide libraries with the essential reference on data mining and warehousing Provided by publisher
