**Data Science Careers, Training, and Hiring** Renata Rawlings-Goss,2019-08-02 This book is an information packed overview of how to structure a data science career a data science degree program and how to hire a data science team including resources and insights from the authors experience with national and international large scale data projects as well as industry academic and government partnerships education and workforce Outlined here are tips and insights into navigating the data ecosystem as it currently stands including career skills current training programs as well as practical hiring help and resources Also threaded through the book is the outline of a data ecosystem as it could ultimately emerge and how career seekers training programs and hiring managers can steer their careers degree programs and organizations to align with the broader future of data science Instead of riding the current wave the author ultimately seeks to help professionals programs and organizations alike prepare a sustainable plan for growth in this ever changing world of data The book is divided into three sections the first Building Data Careers is from the perspective of a potential career seeker interested in a career in data the second Building Data Programs is from the perspective of a newly forming data science degree or training program and the third Building Data Talent and Workforce is from the perspective of a Data and Analytics Hiring Manager Each is a detailed introduction to the topic with practical steps and professional recommendations The reason for presenting the book from different points of view is that in the fast paced data landscape it is helpful to each group to more thoroughly understand the desires and challenges of the other It will for example help the career seekers to

understand best practices for hiring managers to better position themselves for jobs It will be invaluable for data training programs to gain the perspective of career seekers who they want to help and attract as students Also hiring managers will not only need data talent to hire but workforce pipelines that can only come from partnerships with universities data training programs and educational experts The interplay gives a broader perspective from which to build

**Careers in Data Science** Institute for Career Research,2020-03-30 DATA SCIENTISTS HAVE A FASCINATING JOB They are the invaluable professionals that know what to do with the mountains of information that is being created and gathered from every corner of the world every single minute of the day In this highly digitized world today everyone seems to have an urgent need to do something with all the Big Data for fear of missing out on something Businesses from banks to car manufacturers depend on data scientists to help them make important decisions that will bolster their bottom line and edge out the competition Government agencies at all levels use their findings to make important policy changes Even nonprofit organizations depend on data scientists to help them improve the lives of countless people It is a challenging job to take an enormous pile of information and distill it into something useful There is simply too much information for the average person to process and use It is the data scientist s mission to analyze data for actionable insights but theirs is no easy task Using a combination of math statistics and programming skills data scientists are able to compile organize clean and interpret any number of data points They then use their expert analytic skills to uncover hidden solutions that can be applied to a wide range of purposes It takes some rigorous education to become an effective data scientist They need to become expert programmers using tools like Python SQL R and Scala They need cutting edge skills in machine learning data visualization artificial intelligence modeling and optimization They have to be expert in using Excel Most data science professionals have graduate degrees either a master s or PhD in data science statistics computer science or mathematics Data scientists come from a wide range of educational backgrounds though some technical training is always necessary For example those educated in business or human behavior can offer unique perspectives that allow them to arrive at more accurate and relevant conclusions There is a wide array of opportunities for professionals with the advanced skills and know how to work in data science roles The demand is high now well above the national average and the trend is zooming upward Over the next few years the analytics market is expected to grow by leaps and bounds until it is at least one third of the global IT market Organizations of all kinds are scrambling to integrate data science into their business processes Although the demand is rising steadily there is a huge deficit on the supply side of qualified employees creating excellent prospects for future data scientists Those in the field can look forward to a promising job market and longevity and there is more good news as well Data scientists enjoy excellent compensation for their work with a median income of almost 100 000 and the potential to earn 250 000 a year The pay really stands out as an attractive feature plus there are also reports of high job satisfaction No wonder data scientist has been voted the Best Job in America four years in a row
