Brazil Sbm Offshore:

The Oil & Gas Year Brazil 2019 The Energy Year, 2019-09-09 Oil and gas production is expected to increase over the coming decade with the ANP projecting an output of 5.5 million bopd by 2027-2028. Furthermore, 44 offshore production systems are expected to come on line by 2030. Brazil has started to attract the attention of oil majors across the globe and will continue to be a regional investment hub for years to come. As such, the report covers the laws and regulations of the new administration that will shape the local investment environment. This third edition also delves into other attractive business opportunities in Brazil's conventional offshore and onshore basins. Less than 30,000 wells have been drilled in the country's oil and gas history compared to almost double that in Argentina and more than 100 times that in the USA. The ANP recognises the need to incentivise E/P in areas the prolific Pre-Salt Polygon. Despite the progress being made in the development of Brazil's oil and gas industry, challenges loom overhead. Environmental issues will come to the fore as some segments of society contest the new administration's move to a more *laissez faire* market approach, particularly in areas near the Amazon rainforest. The government is under pressure to tackle these issues and push forward the industry's development. Extensive in-depth analysis is supported by comprehensive maps, illustrations, and graphs to create a market guide essential for players seeking to either expand their operations or enter the Brazilian oil and gas market. *Extraterritoriality and*

International Bribery Branislav Hock, 2019-09-11 The book presents a collective action perspective to explain how extraterritoriality functions and assess when and to what extent extraterritoriality is effective. A collective action perspective provides a new account of foreign anti-bribery laws and their extraterritorial enforcement that draws on theories discussed in the field of economic governance. Within this framework, the book offers an intensive analysis of US foreign anti-bribery law such as the Foreign Corrupt Practices Act (FCPA), international law as it emanates from the OECD Anti-Bribery Convention, and comparative insights into UK law and German law. To test the theory in practice, the book provides a unique data set of more than 40 foreign anti-bribery enforcement actions conducted by the US Department of Justice (DOJ) and the Securities and Exchange Commission (SEC) and other examples from comparative jurisdictions. *Extraterritoriality and International Bribery* is ideal reading for academics and students with an interest in global governance, economic crime, criminology, and law and economics, as well as practitioners concerned with foreign anti-bribery enforcement, including compliance officers, lawyers, investigating and prosecuting authorities, and business leaders. The book also discusses governance alternatives existing outside international anti-bribery law and offers policy and legal reforms proposals. The book suggests a decentralized enforcement model with the delegation of some enforcement tasks to an external body as the most appropriate governance alternative. **Resolving Foreign Bribery Cases with Non-Trial Resolutions, Settlements and Non-Trial Agreements**

by Parties to the Anti-Bribery Convention OECD, 2019-03-10 Non-trial resolutions, often referred to as settlements, have been the predominant means of enforcing foreign bribery and other related offences since the entry into force of the OECD
