Visual Metaphors Réka Benczes, Veronika Széld, 2022-09-15 Whenever we think about the world including its concrete and abstract entities we typically see a series of so called mental images in front of our eyes that aid us in everyday problem solving and navigating ourselves in the world Visual metaphors similarly to their linguistic counterparts largely build on such images Nevertheless the interplay of metaphorical metonymical text and imagery is not necessarily and not usually straightforward and raises complex theoretical and methodological questions The eleven chapters in this collection address a wide range of such challenges such as what are visual metaphors in the first place how can they be identified what is their relationship to linguistic metaphors what are their most common manifestations what knowledge structures are required for their interpretation and how do they interact with metonymies The studies cut across linguistics politics philosophy poetry art and history highlighting the ubiquitous role that visual metaphor plays in everyday life and conceptualizations Originally published as special issue of *Cognitive Linguistic Studies* 7 1 2020 Bk. 5. Steps to the Origins of Language David B. Givens, John White, 2025-12-22 Nonverbal Steps to the Origins of Language examines the origin and development of human language through the seemingly paradoxical lens of nonverbal communication. Taking an evolutionary stance, it identifies and explores 15 sequential nonverbal steps that cumulatively enabled modern linguistic communication in Homo sapiens. Each step examines how human communication has evolved over time, detailing the changes that occurred at each developmental stage and their corresponding roles in gestured and spoken language. While following an evolutionary timeline, this book contextualizes these developments within modern discourse on topics such as linguistics, physiology, and brain development. The authors introduce the innovative Language Superimposition Theory (LST), proposing that human language in both its vocal and gestural forms was superimposed upon an older preexisting nonverbal medium. This theoretical framework challenges conventional understanding of language origins by elevating nonverbal communication from its traditionally neglected status. Exploring diverse topics including chemical messaging, audio visual messaging, emotional signaling, binocular vision, facial expressions, pointing behaviors, object manipulation, ancient tool making, and food sharing, this fascinating intellectual journey is a must-read for students of nonverbal communication from psychology, linguistics, and anthropology backgrounds.
