**Learn Modern C++ and STL** Christophe Pichaud, 2021-01-15  
The purpose of this book is to learn modern C. The Modern C is C++ 11, 14, 17, and 20. Organized in themed chapters, this book allows beginners to end the language even by reading the chapters in a different order from that proposed by the author. It is the result of several years of work at the ISO standardization committee level, and the following versions, namely C++ 14, 17, and 20, are only the result of this effort. It should be noted, however, that C++ 20 is still partially implemented by market compilers, whether it's Microsoft's Visual C++ Clang, LLVM, or GCC. On the cloud, everything is Server-oriented, and Linux reigns supreme. Whether it's multithreaded or asynchronous programming with Docker or Azure, it's all about high availability or hyper-scalable environments.

**Windows® via C/C++** Christophe Nasarre, Jeffrey Richter, 2007-11-28  
Master the intricacies of application development with unmanaged C code straight from the experts. Jeffrey Richter's classic book is now fully revised for Windows XP, Windows Vista, and Windows Server 2008. You get in-depth, comprehensive guidance, advanced techniques, and extensive code samples to help you program Windows-based applications. Discover how to Architect and implement your applications for both 32-bit and 64-bit Windows. Create and manipulate processes and jobs. Schedule, manage, synchronize, and destroy threads. Perform asynchronous and synchronous device I/O operations with the I/O completion port. Allocate memory using various techniques, including virtual memory, memory-mapped files, and heaps. Manipulate the default committed physical storage of thread stacks. Build DLLs for delay loading, API hooking, and process injection. Using structured exception handling, Windows Error Recovery, and Application Restart services.

Interactive Systems. Design, Specification, and Verification Joaquim Jorge, Nuno Jardim Nunes, Joao Falcao e Cunha, 2003-10-09  
This book constitutes the thoroughly refereed post-proceedings of the 10th International Workshop on Design, Specification, and Verification of Interactive Systems (DSV-IS 2003) held in Funchal, Madeira Island, Portugal, in June 2003. The 26 revised full papers and 5 revised short papers presented together with an invited paper have passed through two rounds of reviewing, selection, and improvement. The papers are organized in topical sections on test and evaluation, Web and groupware tools and technologies, task modeling, model-based design, mobile and multiple devices, UML, and specification languages.
